Use of Languages

Principal working language: spanish (spa)

Prerequisites

There are no prerequisites.

Objectives and Contextualisation

- Identify the main techniques that consider language and discourse as a form of accessing and understanding reality.
- Methodologically justify choosing a particular research technique.
- Know and apply the criteria of methodological rigor in qualitative research.
- Get familiar with the practice of qualitative research.
- Recognize the possibilities and limits of different research techniques.

Competences

- Continue the learning process, to a large extent autonomously.
- Defend and justify arguments with clarity and precision, so appropriate to the context, valuing the contributions of others.
- Establish operational objectives substantiated theoretically and socially relevant to take into account the complexity of the psychosocial reality.
- Selecting and applying necessary for collection, analysis and presentation of empirical material qualitative techniques.
- Solve problems in new or little-known situations within broader (or multidisciplinary) contexts related to the field of study.
- Theoretically guide the definition of objectives, design and analysis in understanding the psychosocial phenomena.

Learning Outcomes

1. Continue the learning process, to a large extent autonomously.
2. Defend and justify arguments with clarity and precision, so appropriate to the context, valuing the contributions of others.
3. Describe the discursive and narrative perspectives and their importance for the study of a particular research problem
4. Perform a viable plan research from a research question and objectives set
5. Solve problems in new or little-known situations within broader (or multidisciplinary) contexts related to the field of study.
6. Specify and evaluate the operational objectives of a research plan from the discursive perspective, according to a research question

Content

- Criteria for the evaluation of qualitative methods
- Thematic analysis
- Obtaining qualitative data through interviews
- Collecting Life Stories
- Narrative Organization of discourse
- Dérive in Social Investigation
- Ethnographic writing
- Credibility in Qualitative Research

Methodology

Teaching methodology

Directed Activities:

- Presentation of contents
- Presentation and analysis of theoretical readings
- Group Discussions
- Presentation of research exercises
- Elaboration of contents according to research interests

Supervised Activities:

- Tutorials about the definition of the research topic and the empirical procedures
- Activities in the virtual campus of:
 - Search for additional bibliographic material
 - Exemplification of topics in different types of research
 - Discussion and articulation of different methodological perspectives

Autonomous Learning Activities

- Collection and systematization of bibliographic material
- Analysis and reflection on readings
- Theoretical and methodological integration
- Development of a research proposal
