Antoni Oliver González
Adrià Martín Mor

Prerequisites

Having taken, or taking, the previous MA modules.

Objectives and Contextualisation

The aim of this module is to enable the student to acquire the knowledge and skills needed to prepare a final master's dissertation in the field of translation technologies or technology research.

Competences

- Communicate and justify conclusions clearly and unambiguously to both specialist and non-specialist audiences.
- Define, evaluate and solve problems related to translation technologies.
- Design and conduct research projects on translation technologies, using suitable research methods and suggesting ways to improve.
- Integrate knowledge and use it to make judgements in complex situations, with incomplete information, while keeping in mind social and ethical responsibilities.
- Know the professional translation and post-editing market: its profiles, requirements and socio-economic role.
- Make informed, well-reasoned decisions in the field of translation technologies.
- Manage one's own knowledge consistently and systematically, in coordination with other persons and independently, with the emphasis on quality.
- Use acquired knowledge as a basis for originality in the application of ideas, often in a research context.
Learning Outcomes

1. Carry out complete translation processes in a team, integrating complex workflows.
2. Communicate and justify conclusions clearly and unambiguously to both specialist and non-specialist audiences.
3. Detect design flaws in tools (interface, workflow, etc.), in traditional and automated translation processes.
4. Devise a research process in one of the areas of translation studies.
5. Identify and anticipate problems and solutions associated with the various types of translation projects and the stages in these.
6. Integrate knowledge and use it to make judgements in complex situations, with incomplete information, while keeping in mind social and ethical responsibilities.
7. Make informed, well-reasoned decisions in the field of translation technologies.
8. Make original contributions to the research community.
9. Manage one's own knowledge consistently and systematically, in coordination with other persons and independently, with the emphasis on quality.
10. Perform critical analyses and syntheses of new ideas in one of the areas of Translation Studies.
11. Plan the stages and resources to carry out research into one of the areas of translation studies.
12. Select the right research methods for each object of research.
13. Use acquired knowledge as a basis for originality in the application of ideas, often in a research context.
14. Use the appropriate documentation for a research process in one of the areas of translation studies.

Content

Redacting the Master's dissertation according to the detailed instructions provided by the coordination.

Methodology

- Tutoring
- Writing the master's dissertation
- Reading: books/articles/reports of interest
- Self-study
- Preparing reports/essays

Assessment

- 80% Written report of the Master's dissertation, divided into:
20% First submission
20% Second submission
40% Final Submission

• 20% Defence of the Master's dissertation

Related matters

The above information on assessment, assessment activities and their weighting is merely a guide. The subject's lecturer will provide full information when teaching begins.

Review

When publishing final marks prior to recording them on students' transcripts, the lecturer will provide written notification of a date and time for reviewing assessment activities. Students must arrange reviews in agreement with the lecturer.

Missed/failed assessment activities

Students may retake assessment activities they have failed or compensate for any they have missed, provided that those they have actually performed account for a minimum of 66.6% (two thirds) of the subject's final mark and that they have a weighted average mark of at least 3.5. Under no circumstances may an assessment activity worth 100% of the final mark be retaken or compensated for.

The lecturer will inform students of the procedure involved, in writing, when publishing final marks prior to recording them on transcripts. The lecturer may set one assignment per failed or missed assessment activity or a single assignment to cover a number of such activities.

Classification as "not assessable"

In the event of the assessment activities a student has performed accounting for just 25% or less of the subject's final mark, their work will be classified as "not assessable" on their transcript.

Misconduct in assessment activities

Students who engage in misconduct (plagiarism, copying, personation, etc.) in an assessment activity will receive a mark of "0" for the activity in question. In the case of misconduct in more than one assessment activity, the students involved will be given a final mark of "0" for the subject.

Students may not retake assessment activities in which they are found to have engaged in misconduct. Plagiarism is considered to mean presenting all or part of an author's work, whether published in print or in digital format, as one's own, i.e. without citing it. Copying is considered to mean reproducing all or a substantial part of another student's work. In cases of copying in which it is impossible to determine which of two students has copied the work of the other, both will be penalised.
