Use of Languages

Principal working language: spanish (spa)
Some groups entirely in English: No
Some groups entirely in Catalan: No
Some groups entirely in Spanish: No

Prerequisites

This subject does not have any pre-requirements

Objectives and Contextualisation

The subject objectives are to aim at a reflection of some of the primary objectives of the degree. Students must apply their knowledge, conceptual and normative, to the management of the so-called Private Security Sector, security companies and private security personnel, knowing and distinguishing the different types of services that can be presented to users, public or private, and the functions and limits of the professional attributions attributed to the different professional categories.

This will form the basis from which the student will have the adequate baggage to formulate proposals for quality of service within private security, always taking into account the regulatory framework and the needs of private security consumers.

Know the concepts and regulatory framework of public safety and private security.

Understand the bases for the provision of private security services.

Familiarize oneself with private security legislation.

Distinguish the functions attributed to the Security Forces and Bodies, and the services and activities that, in a complementary and subordinate manner, can be provided by private security operators.

Achieve a competence level suitable for the theoretical and regulatory content that allows the professionals of the Degree, to relate and coordinate with technicians in this field.

Competences

- Apply the legal regulations governing the sector of prevention and integral security.
- Assume the social, ethical and professional responsibility that derives from professional practice.
- Be able to adapt to unexpected situations.
- Carry out analyses of preventative measures in the area of security.

- Efficiently manage human resources.
- Generate innovative and competitive proposals in research and in professional activity developing curiosity and creativity.
- Identify, manage and resolve conflicts.
- Plan and coordinate the resources of the three large subsystems that interact in questions of security: people, technology and infrastructures.
- Respond to problems applying knowledge to practice.
- Use the capacity for analysis and synthesis to solve problems.
- Work in institutional and interprofessional networks.

Learning Outcomes

1. Apply the rules of professional practice for private security and private research.
2. Assume the social, ethical and professional responsibility that derives from professional practice.
3. Be able to adapt to unexpected situations.
4. Diagnose the situation of integral security in companies and organisations.
5. Generate innovative and competitive proposals in research and in professional activity developing curiosity and creativity.
6. Identify, manage and resolve conflicts.
7. Plan and manage prevention and security in accordance with the prevailing legislation applicable in the sector.
8. Respond to problems applying knowledge to practice.
9. Select the minimum resources for efficient risk management.
10. Undertake collaborative management of private security plans.
11. Use the capacity for analysis and synthesis to solve problems.
12. Work in institutional and interprofessional networks.

Content

1. Public security system in relation to the private security system.
2. Private security concept
3. The provision of private security services.
4. Companies and organizations as consumers of security.

Methodology

Considering that the modality of the class is Online, with the aim of achieving the learning objectives described in this Guide, we will develop a methodology that combines the individual study from the Manual, and the readings that will be presented in each topic.

The tutorials with the teaching staff will be arranged by email.

Activities

Title	Hours	ECTS	Learning Outcomes
Type: Directed			
Theoretical and practical classes with the participation of students	44	1.76	1, 4, 10, 7, 9
Type: Supervised			
Tutorials with the students	12	0.48	1, 4, 10, 7, 9
Type: Autonomous			

Assessment

The theoretical tests, which account for 40% of the final grade obtained, take the form of a written and / or oral exam.

The practical works on the topics worked in the classroom represent 60% of the final grade and will be presented in writing.

There will be exercises in class and their resolution is 10% of the grade

In case of not passing the subject according to the aforementioned criteria (continuous evaluation), a recovery test may be done on the scheduled date to the schedule, and it will cover the entire contents of the program.

To participate in the recovery the students must have been previously evaluated in a set of activities, the weight of which equals a minimum of two thirds of the total grade of the subject. However, the grade that will be included in the student's file is a maximum of 5-Pass.

Students who need to change an evaluation date must present the request by filling in the document that you will find in the moodle space of Tutorial EPSI.

Notwithstanding other disciplinary measures deemed appropriate, and in accordance with current academic regulations, "in the event that the student makes any irregularity that could lead to a significant variation in the grade of an evaluation act, it will be graded with a 0 This evaluation act, regardless of the disciplinary process that can be instructed In case of several irregularities occur in the evaluation acts of the same subject, the final grade of this subject will be 0 ".

The tests / exams may be written and / or oral at the discretion of the teaching staff.

Assessment Activities

Title	Weighting	Hours	ECTS	Learning Outcomes
Delivery of the work done individually or in groups (indicated in class)	50%	0	0	3, 1, 2, 4, 5, 10, 6, 7, 9, 12, 11
Practical exercise	10%	0	0	1, 9
Written and / or oral tests that allow to value the knowledge acquired by the student	40%	0	0	1, 4, 8, 10, 7, 9, 11
