## Methodology

- The classes will be asynchronous digital are directed by the faculty of the subject and take place in the virtual spaces of the university. They will be dynamic and digital classes by the large group: the digital class aimed at the large group allows the exposition of the main contents and elements of discussion of the different thematic blocks and the seminars are spaces for small group work to analyze and debate the proposed activities. by teachers, mainly in the Virtual Campus, in order to complement the theoretical sessions. The seminars will be face-to-face at the university and are compulsory attendance, students will be assigned to one of the groups scheduled at the beginning of the course.

- The activities supervised by the teacher outside the classroom include the set of individual and group, physical and virtual tutorials, which should serve to solve difficulties, guide tasks and ensure understanding of the learning of the subject.

- Autonomous work is carried out independently by the student and involves the preparation of readings, cases and other types of tasks, exercises or assignments, in order to make the most of the sessions and achieve the objectives of the subject.

The proposed teaching methodology may undergo some modification depending on the face-to-face restrictions imposed by the health authorities,

## Assessment

The evaluation of the course will be held throughout the academic year through the activities shown in the grid below: assistances and participation in seminars (20%), personal work (30%), exam (50%)

Class attendance is mandatory: students must attend at least 80% of the classes, otherwise they will not be considered for evaluation. Attendance to both theoretical and practical classes will be controled.

The results of each of the assessment activities will be communicated to the students through the Moodle no longer than 20 working days from the due date. After the grades of each activity are communicated to the students, they can attend to the professors' office hours for any queries concerning the assessment up to 10 days after their publication.

The final grade of the subject will be calculated by weighting the proposed evaluation activities, as indicated on the grid. In order to pass the subject, each of the evaluation activities it consists of will be approved with a minimum of 5. Students will be able to do a re-evaluation in case they have not passed any of the evidence of evaluation (within the school period and marked in the schedule). The final grade for this reevaluation will be approved or unapproved.

The dates of the different evaluation activities are shown in the following table:

Activity	Average Weight	Dates Group 61	Dates Group 62
Deepening work seminar section A (group activity)	15%	Seminari date	Seminari date
Deepening work seminar section B (group activity)	15%	Seminar date	Seminar date
