Content

The practical training consists of 250 hours internship in a company within the tourist industry either from a national or international scope. The content of this subject includes the internship period (250h), the completion of the memorandum report and the attendance to the workshop, other events and activities organized during the year (50h) with the aim to assess the student on his/her career objectives.

It pursues the student to get to know the organization, operations, and management basics within the catering industry, covering guest attendance and/or the management of its services. If needed, the EUTDH will offer a

wide range of partner companies that cooperate for the students to achieve their goals. To this extend, we highlight the *Workshop-Trobada Empreses-Escola* that takes place in February every year, amongst the activities and events that the student must attend in order to pass the subject.

As we do the previous academic course (Practicum), with a view to promoting our students' development of their management skills, we also encourage them to act as consultants and develop an intrapreneurship project in any of the organizations where they perform their internship. In case of interest to further develop as consultants in the field, we foster internal synergies with other subjects so that the student has the appropriate resources within the academic program to develop his/her project management skills (i.e: Bachelor's Degree Final Project, Business Start-Up and Innovation, Management of Operations, Quality and Environment, Hotel Management, etc.).

Methodology

The course will be taught using three different teaching methodologies:

- a) Learning by doing - practical training at a professional environment, duly monitored and tutored by an expert on the professional field.
- b) Self-assessment and self-analysis tasks encouraged and supported by the University tutor/s (in case of synergies with other subjects) during the development period of the internship or consulting / intrapreneurship project.
- c) Autonomous or group work after being in contact with industry professionals to better understand the business operations and the professional profiles that better match each role and type of company.

Additionally, the student will have to be adapted to the culture of the organization, its internal regulation and values while considering the tutor instructions and the EUTDH main rules.

Activities

Assessment

The assessment will include:

a) The company tutor assessment of the student's performance which will include a validation of specific skills required in the workplace (i.e: time management, communication, emotional intelligence, assertiveness, team work, conflict resolution, work under pressure, creativity, proactivity, etc.).

b) The Internship Memorandum elaborated by the student or the project presentation graded by the commissioner -50%- and the University tutor -50%- (only in case of consulting or intrapreneurship project development internships). This is important to note here that in some cases the consultancy project may be linked to other subjects related to entrepreneurship where the student is enrolled in. In that later case, the project should normally be assessed and tutored by a University professor during the development period.

c) The ongoing assessment and evaluation of the student performance considers the attendance to classroom sessions and workshops, such as the opening session of the subject, group dynamics and tasks, inspirational and coaching sessions with the academic tutor and any other events organized by the EUTDH (i.e. *Workshop-Trobada Empreses-Escola*).
