Use of Languages

Principal working language: spanish (spa)
Some groups entirely in English: No
Some groups entirely in Catalan: No
Some groups entirely in Spanish: Yes

Prerequisites

Language requirements: German C1.2 (CEFR). Exchange students should contact the course coordinator regarding Spanish language level requirements.

At the beginning of the course, students should be able to:

- Demonstrate knowledge of the basic methodological principles governing translation, professional and instrumental aspects and the contrastive problems for this language combination.
- Apply this knowledge to solving translation problems in specialised texts.
- Combine different areas of knowledge when taking decisions about questions related to the translation of specialised texts.
- Convey information, ideas, problems and solutions relating to translating specialised texts.

Objectives and Contextualisation

The aim of this course is to further develop problem-solving skills when translating different types of legal, financial, scientific and technical texts.

By the end of this course students should be able to:

- Demonstrate knowledge and understanding of the basic methodological principles governing the translation of legal, financial, scientific and technical texts, professional and instrumental aspects, and contrastive problems for this language combination.
- Apply this knowledge to solving translation problems in legal, financial, scientific and technical texts.
- Combine different areas of knowledge when making decisions about questions related to translating legal, financial, scientific and technical texts.
- Convey information, ideas, problems and solutions related to translating legal, financial, scientific and technical texts.

- Apply their skills so that they can work with greater autonomy in future specialised studies in translating legal, financial, scientific and technical texts.

Competences

- Applying topic-based knowledge in order to translate.
- Mastering the main methodological principles of translation.
- Mastering the professional aspects of translation.
- Producing written texts in a foreign language in order to translate.
- Producing written texts in language A in order to translate.
- Solving translation problems from different specialisation fields (legal, financial, scientific, technical, literary, audiovisual texts, localization).
- Understanding written texts in a foreign language in order to translate.
- Using documentation resources in order to translate.
- Using technological resources in order to translate.
- Using terminological resources in order to translate.

Learning Outcomes

1. Applying technological resources in order to solve translation problems: Applying the technological resources in order to solve legal and financial translation problems.
2. Applying technological resources in order to solve translation problems: Applying the technological resources in order to solve technical and scientific translation problems.
3. Applying terminological resources in order to solve translation problems: Applying terminological resources in order to solve translation problems.
4. Applying the documentation resources in order to solve translation problems: Applying the documentation resources in order to solve translation problems.
5. Appropriately following the different phases for the creation of a translation and carrying out the assigned tasks: Appropriately following the different phases for the creation of a legal or financial translation and carrying out the assigned tasks.
6. Appropriately following the different phases for the creation of a translation and carrying out the assigned tasks: Appropriately following the different phases for the creation of a technical or scientific translation and carrying out the assigned tasks.
7. Comprehending the communicative purpose and sense of written texts of several fields: Comprehending the communicative purpose and sense of legal and financial written texts.
8. Comprehending the communicative purpose and sense of written texts of several fields: Comprehending the communicative purpose and sense of technical and scientific written texts.
9. Handling problems related to the practice of the profession of translator: Handling problems related to the practice of the profession of translator.
10. Identifying the need to mobilise topic-based knowledge in order to translate: Identifying the need to mobilise topic-based knowledge in order to translate legal and financial texts.
11. Identifying the need to mobilise topic-based knowledge in order to translate: Identifying the need to mobilise topic-based knowledge in order to translate technical and scientific texts.
12. Implementing strategies in order to produce written texts of different fields and with specific communicative purposes: Implementing strategies in order to produce technical and scientific texts with specific communicative purposes.
13. Implementing strategies in order to understand written texts from different fields: Implementing strategies in order to comprehend technical and scientific written texts.
14. Implementing strategies to acquire topic-based knowledge in order to translate: Implementing strategies to acquire topic-based knowledge in order to translate legal and financial texts.
15. Implementing strategies to acquire topic-based knowledge in order to translate: Implementing strategies to acquire topic-based knowledge in order to translate technical and scientific texts.
16. Incorporating topic-based knowledge in order to solve translation problems: Incorporating topic-based knowledge in order to solve legal and financial translation problems.
17. Incorporating topic-based knowledge in order to solve translation problems: Incorporating topic-based knowledge in order to solve technical and scientific translation problems.

18. Producing written texts that are appropriate to their context and possess linguistic correctness: Producing legal and financial written texts, that are appropriate to their context and possess linguistic correctness.
19. Solving interferences between the working languages: Solving interferences between the working languages.
20. Students must demonstrate they know the techniques and strategies needed to solve translation problems: Students must demonstrate they know the techniques and strategies needed to solve problems of legal and financial translation.
21. Students must demonstrate they know the techniques and strategies needed to solve translation problems: Students must demonstrate they know the techniques and strategies needed to solve problems of technical and scientific translation.
22. Using the appropriate strategies and techniques in order to solve translation problems: Using the appropriate strategies and techniques in order to solve legal and financial translation problems.
23. Using the appropriate strategies and techniques in order to solve translation problems: Using the appropriate strategies and techniques in order to solve technical and scientific translation problems.

Content

Legal-administrative block

- Primary Sources of Linguistic Combination Law
- Comparative law of the legal families of the language combination (B-A)
- Job profiles of legal and financial translation in the language combination (sworn translator, court translator, legal translator), professional associations and other aspects of the sector.
- Solving translation problems of legal genres of company law such as articles of association, articles of association, minutes of meetings, etc.
- Resolution of translation problems of legal genres of procedural law such as judgments, judicial documents of communication between the parties, foreclosures, etc.
- Solving translation problems of financial goods such as payrolls, investment fund company advertising brochures, audit reports, annual accounts, specialized press articles, etc.
- Use of dictionaries, glossaries, specialised databases and parallel texts suitable for legal translation.

Scientific-technical block

- Specific processes of scientific-technical translation in the linguistic combination (pre-translation, translation, revision...)
- Solving translation problems of scientific genres such as the original research article, clinical reports, conferences, specialised monographs, specialised textbooks, popularisation articles, and information for patients, etc.
- Solving translation problems of technical genres such as patents, technical reports, specialized instruction manuals, technical standards, technical projects, etc.
- Use of dictionaries, glossaries, specialized databases and parallel texts suitable for scientific-technical translation.

[IMPORTANT: The contents gathered here are orientative. The teacher will decide the specific contents of the course.]

Methodology

- Translation exercises, summaries

- Solving translation problems
- Cooperative learning
- Use of Virtual Campus tools
- Use of technological and multimedia resources
- Lectures on theoretical aspects of each specialised area
- Individual and group work

Activities

Title	Hours	ECTS	Learning Outcomes
Type: Directed			
Directed activities	50	2	4, 1, 2, 3, 14, 15, 13, 12, 7, 8, 20, 21, 9, 10, 11, 16, 17, 18, 5, 6, 19, 22, 23
Type: Supervised			
Supervised activities	50	2	4, 1, 2, 3, 14, 15, 13, 12, 7, 8, 20, 21, 9, 10, 11, 16, 17, 18, 5, 6, 19, 22, 23
Type: Autonomous			
Autonomous activities	40	1.6	4, 1, 2, 3, 14, 15, 13, 12, 7, 8, 20, 21, 9, 10, 11, 16, 17, 18, 5, 6, 19, 22, 23

Assessment

Translation exercises

Individual translation exercises will be assigned during the course (the exact number will be determined by the lecturer and will vary depending on the dynamics of the course). The nature of such exercises and their deadlines will be specified in the schedule. Work submitted after deadlines will not be accepted under any circumstances. Exercises must be submitted in the format specified.

The lecturer will indicate any special conditions related to the submission of work applicable to exchange students from foreign universities.

All information on assessment, assessment activities and their weighting is merely a guide. The subject's lecturer will provide full information when teaching begins.

Review

When publishing final marks prior to recording them on students' transcripts, the lecturer will provide written notification of a date and time for reviewing assessment activities. Students must arrange reviews in agreement with the lecturer.

Missed/failed assessment activities

Students may retake assessment activities they have failed or compensate for any they have missed, provided that those they have actually performed account for a minimum of 66.6% (two thirds) of the subject's final mark and that they have a weighted average mark of at least 3.5. Under no circumstances may an assessment activity worth 100% of the final mark be retaken or compensated for.

The lecturer will inform students of the procedure involved, in writing, when publishing final marks prior to recording them on transcripts. The lecturer may set one assignment per failed or missed assessment activity or a single assignment to cover a number of such activities.

Classification as "not assessable"

In the event of the assessment activities a student has performed accounting for just 25% or less of the subject's final mark, their work will be classified as "not assessable" on their transcript.

Misconduct in assessment activities

Students who engage in misconduct (plagiarism, copying, personation, etc.) in an assessment activity will receive a mark of "0" for the activity in question. In the case of misconduct in more than one assessment activity, the students involved will be given a final mark of "0" for the subject.

Students may not retake assessment activities in which they are found to have engaged in misconduct. Plagiarism is considered to mean presenting all or part of an author's work, whether published in print or in digital format, as one's own, i.e. without citing it. Copying is considered to mean reproducing all or a substantial part of another student's work. In cases of copying in which it is impossible to determine which of two students has copied the work of the other, both will be penalised.

IMPORTANT

If a student has a valid reason for being unable to attend regularly, they must contact the lecturer personally during the first weeks of the course, or it will not be possible for them to take the final exam and pass the subject.

Assessment Activities

Title	Weighting	Hours	ECTS	Learning Outcomes
Glossary of Terminology	20%	2	0.08	4, 1, 2, 3, 14, 15, 13, 12, 7, 8, 20, 21, 9, 10, 11, 16, 17, 18, 5, 6, 19, 22, 23
Legal-administrative translation	30%	3	0.12	4, 1, 2, 3, 14, 15, 13, 12, 7, 8, 20, 21, 9, 10, 11, 16, 17, 18, 5, 6, 19, 22, 23
Scientific-technical translation	30%	3	0.12	4, 1, 2, 3, 14, 15, 13, 12, 7, 8, 20, 21, 9, 10, 11, 16, 17, 18, 5, 6, 19, 22, 23
Solving individual assignments in legal, administrative, scientific and technical Translation	20%	2	0.08	4, 1, 2, 3, 14, 13, 12, 7, 8, 20, 21, 9, 10, 11, 16, 17, 18, 5, 6, 19
