Use of Languages

Principal working language: catalan (cat)
Some groups entirely in English: Yes
Some groups entirely in Catalan: Yes
Some groups entirely in Spanish: No

Teachers

Ferran Caballero Puig
Nuria Estrach Mira
Olga Fernández Prat
Oscar Castro García
Irene Gómez Franco
Alba Torrents González

Prerequisites

None

Objectives and Contextualisation

This course aims at introducing to the main subjects and debates in the history of thought.

Competences

Musicology

- Developing critical thinking and reasoning and communicating them effectively both in your own and other languages.
- Students must be capable of applying their knowledge to their work or vocation in a professional way and they should have building arguments and problem resolution skills within their area of study.
- Students must be capable of collecting and interpreting relevant data (usually within their area of study) in order to make statements that reflect social, scientific or ethical relevant issues.
- Students must be capable of communicating information, ideas, problems and solutions to both specialised and non-specialised audiences.
- Students must develop the necessary learning skills to undertake further training with a high degree of autonomy.
- Students must have and understand knowledge of an area of study built on the basis of general secondary education, and while it relies on some advanced textbooks it also includes some aspects coming from the forefront of its field of study.

Archaeology

- Developing critical thinking and reasoning and communicating them effectively both in your own and other languages.
- Respecting the diversity and plurality of ideas, people and situations.
- Students must be capable of applying their knowledge to their work or vocation in a professional way and they should have building arguments and problem resolution skills within their area of study.
- Students must be capable of collecting and interpreting relevant data (usually within their area of study) in order to make statements that reflect social, scientific or ethical relevant issues.
- Students must be capable of communicating information, ideas, problems and solutions to both specialised and non-specialised audiences.
- Students must develop the necessary learning skills to undertake further training with a high degree of autonomy.
- Students must have and understand knowledge of an area of study built on the basis of general secondary education, and while it relies on some advanced textbooks it also includes some aspects coming from the forefront of its field of study.

Spanish Language and Literature

- Students must be capable of applying their knowledge to their work or vocation in a professional way and they should have building arguments and problem resolution skills within their area of study.
- Students must be capable of collecting and interpreting relevant data (usually within their area of study) in order to make statements that reflect social, scientific or ethical relevant issues.
- Students must be capable of communicating information, ideas, problems and solutions to both specialised and non-specialised audiences.
- Students must develop the necessary learning skills to undertake further training with a high degree of autonomy.
- Students must have and understand knowledge of an area of study built on the basis of general secondary education, and while it relies on some advanced textbooks it also includes some aspects coming from the forefront of its field of study.

Social and Cultural Anthropology

- Students must be capable of collecting and interpreting relevant data (usually within their area of study) in order to make statements that reflect social, scientific or ethical relevant issues.
- Students must be capable of communicating information, ideas, problems and solutions to both specialised and non-specialised audiences.
- Students must develop the necessary learning skills to undertake further training with a high degree of autonomy.
- Students must have and understand knowledge of an area of study built on the basis of general secondary education, and while it relies on some advanced textbooks it also includes some aspects coming from the forefront of its field of study.

History

- Developing critical thinking and reasoning and communicating them effectively both in your own and other languages.
- Students must be capable of collecting and interpreting relevant data (usually within their area of study) in order to make statements that reflect social, scientific or ethical relevant issues.

- Students must be capable of communicating information, ideas, problems and solutions to both specialised and non-specialised audiences.
- Students must develop the necessary learning skills in order to undertake further training with a high degree of autonomy.
- Students must have and understand knowledge of an area of study built on the basis of general secondary education, and while it relies on some advanced textbooks it also includes some aspects coming from the forefront of its field of study.

Learning Outcomes

1. Arguing about several issues and philosophical problems for the purpose of different works and the assessment of the results.
2. Arguing about several subjects and philosophical problems for the purpose of different works and assessing the results.
3. Autonomously searching, selecting and processing information both from structured sources (databases, bibliographies, specialized magazines) and from across the network.
4. Correctly, accurately and clearly communicating the acquired philosophical knowledge in oral and written form.
5. Distinguishing some representative texts from the main genres of the philosophical literature.
6. Distinguishing some representative texts of the main genres of the philosophical literature.
7. Effectively communicating and applying the argumentative and textual processes to formal and scientific texts.
8. Effectively expressing themselves and applying the argumentative and textual processes of formal and scientific texts.
9. Establishing relationships between science, philosophy, art, religion, politics, etc.
10. Establishing relationships between science, philosophy, art, religion, politics, etc.
11. Identifying errors of normativity, stylistics or argumentation in a text.
12. Identifying normative, stylistic or argumentative errors in a text.
13. Organizing their own time and work resources: designing plans with priorities of objectives, calendars and action commitments.
14. Organizing their own time and work resources: designing plans with priorities of objectives, schedules and action commitments.
15. Recognising and implementing the following teamwork skills: commitment to teamwork, habit of cooperation, ability to participate in the problem solving processes.
16. Rewriting the stance of a typical philosophical author in a clear and precise manner.
17. Submitting works in accordance with both individual and small group demands and personal styles.
18. Summarizing the main arguments of the analysed philosophical texts.
19. Using suitable terminology when drawing up an academic text.

Content

The course is divided into four sections, grouped into two large blocks.

In the first block, sections no. 1 to 3 with a general overview of the great debates of the history of thought will be presented

In the second block, in section no. 4 The philosophical debates of our time We will discuss based on the conceptual tools learned during the first block.

Methodology

The methodology of the course combines presentations of the theory by the teaching staff and participatory activities in small groups in the form of a seminar.

Annotation: Within the schedule set by the centre or degree programme, 15 minutes of one class will be reserved for students to evaluate their lecturers and their courses or modules through questionnaires.

Annotation: Within the schedule set by the centre or degree programme, 15 minutes of one class will be reserved for students to evaluate their lecturers and their courses or modules through questionnaires.

Activities

Title	Hours	ECTS	Learning Outcomes
Type: Directed			
Master Classes	35	1.4	5, 6, 10, 9, 18
Seminars	11	0.44	16
Type: Supervised			
Tutoring	22	0.88	2, 7
Type: Autonomous			
Readings of the recommended bibliography	44	1.76	5, 6, 10, 9
Study/Case resolution	31	1.24	2, 4, 7, 18

Assessment

The assessment method will consist of three tests: individual written tests of short answer or equivalent (test). The third one will have to be different, like an examination to do at home and return after 48 hours or an oral presentation. The first test will be used to evaluate topics 1 and 2, the second one for topic 3 and the third one for topic 4. Tests will be done once the topics associated with each of them are completed. Each test will be worth a maximum of 10 points and there will be a global average obtained from the summary of the results of the three tests $((P1 + P2 + P3) / 3)$ that give at least 5 points in order to pass the course. It is necessary to make the 3 tests to be approved.

To make oral presentations, a minimum of three people is recommended per group. The presentations will be of a maximum of 15 minutes, replacing the master classes.

A maximum of three days will be reserved for the purpose of carrying out these exhibitions.

Reassessments: students who have done at least two of the three tests, and have not passed some or all of the tests, or seek to raise notes, may re-examine those tests that have not been done or have not been passed, or to do a single test-type test to evaluate the three parts. In order to raise qualifications it is necessary to pass the three reassessment tests.

Students who have not done a minimum of two tests will be considered as 'non-evaluable'.

In the event of a student committing any irregularity that may lead to a significant variation in the grade awarded to an assessment activity, the student will be given a zero for this activity, regardless of any disciplinary process that may take place. In the event of several irregularities in assessment activities of the same subject, the student will be given a zero as the final grade for this subject.

In the event that the tests cannot be done in person, their format will be adapted (maintaining their weighting) to the possibilities offered by the UAB's virtual tools. Homework, activities and class participation will be done through forums, wikis and / or exercise discussions through Teams, etc. The teacher will ensure that the Student can access it or offer alternative means, which are within his / her reach.

Assessment Activities

Title	Weighting	Hours	ECTS	Learning Outcomes
Multiple choice test or equivalent	40%	2.5	0.1	2, 1, 3, 4, 5, 6, 9, 10, 8, 7, 19, 11, 12, 13, 14, 17, 16, 15, 18
Multiple choice test or equivalent 2	40	2.5	0.1	2, 1, 3, 4, 5, 6, 9, 10, 8, 7, 19, 11, 12, 13, 14, 17, 16, 15, 18
Short answers test or oral presentation	20	2	0.08	4, 6, 10, 12, 14, 7, 16, 15, 18

Bibliography

This bibliography presents some of the books that are used in class for specific questions, none of them does the "manual" function to be able to follow the whole subject.

Bréhier, Émile (1998), *Història de la filosofia i de la ciència*. Madrid: Tecnos.

Copleston, Frederick (2001) *Manual de Filosofia, 9 Vol.* Barcelona: Ariel.

Ferrater Mora, Josep (1981) *Diccionario de Filosofía, 4 Vol.* Madrid: Alianza.

Geymonat, Ludovico (1998) *Història de la filosofia i de la ciència*. Barcelona, Crítica.

Jaspers, K. (1993). *Introducció a la Filosofia*. Barcelona: Edicions 62.

Rowlands, M. (2009) *El filòsofo y el lobo*, Barcelona, Seix Barral.

Reale, Giovanni et al. (1988) *Historia del pensamiento filosófico y científico, 3 Vol.* Barcelona: Herder.

Stanford Encyclopèdia of Philosophy. Veure <https://plato.stanford.edu/>

Terricabras, J. M, coor. (2001). *El pensament filosòfic i científic. I i II*. Barcelona: Pòrtic

Volpi, Franco (2005) *Enciclopèdia de obras de filosofía*, Barcelona: Herder.
