### Objectives and Contextualisation

Ancient Philosophy (6 ECTS) is a subject considered UAB Basic Training, scheduled for the second year of following undergraduate programs: Bachelor's Degree in Philosophy and Bachelor's Degree in Ancient Studies.

The subject fulfills two goals: on the one hand, it is mainly the study of the two most important authors of ancient philosophy (Plato and Aristotle), which at the same time are the most important of philosophy in general. On the other hand, since the field of study is historiographically the same as that of the birth of philosophy, the subject is also a beginning to philosophy, in its historical singularity. In this sense, the study of the first philosophers will be done through two of the most indicated figures: Heraclitus and Parmenides.

### Competences

#### Philosophy

- Analysing and summarising the main arguments of fundamental texts of philosophy in its various disciplines.
- Placing the most representative philosophical ideas and arguments of a period in their historical background and relating the most important authors of each period of any philosophical discipline.
- Recognising and interpreting topics and problems of philosophy in its various disciplines.
- Students must be capable of communicating information, ideas, problems and solutions to both specialised and non-specialised audiences.
- Students must develop the necessary learning skills to undertake further training with a high degree of autonomy.
- Students must have and understand knowledge of an area of study built on the basis of general secondary education, and while it relies on some advanced textbooks it also includes some aspects coming from the forefront of its field of study.

- Using the symbology and procedures of the formal sciences in the analysis and building of arguments.

#### Ancient Studies

- Dominate the use of specific instruments, with special attention to digital tools, for analysing the ancient world.
- Interrelate linguistic, historical and archaeological knowledge of the ancient world with knowledge of other areas of the humanities, mainly ancient literature, philosophy and art.
- Recognise the impact of some important aspects of the ancient world in contemporary culture and society.
- Students must be capable of communicating information, ideas, problems and solutions to both specialised and non-specialised audiences.
- Students must have and understand knowledge of an area of study built on the basis of general secondary education, and while it relies on some advanced textbooks it also includes some aspects coming from the forefront of its field of study.

## **Methodology**

Classes are based on the teacher's exposition ("master classes"). However, there is usually room for debates, text comments and small student presentations.

The dynamics of the class makes it necessary to read texts indicated by the teacher outside the classroom timetable.

Annotation: Within the schedule set by the centre or degree programme, 15 minutes of one class will be reserved for students to evaluate their lecturers and their courses or modules through questionnaires.

## **Activities**

Title	Hours	ECTS	Learning Outcomes
-------	-------	------	-------------------

Type: Directed

Classes	45	1.8	2, 22, 8, 9, 7, 26, 1
Type: Supervised			
Reports	22.5	0.9	22, 4, 5, 6, 16, 3, 10, 11, 14, 13, 17, 18, 21, 25
Type: Autonomous			
Readings and study	75	3	4, 5, 10, 14, 13, 21

## Assessment

The evaluation will consist of 3 multiple choice tests, at the end of each of the three thematic blocks (of 1.5 points each), 2 deliveries of reports in the periods between the test tests (of 1 point each) and a test written final (3.5 points).

The student who has not done at least a number of assessment activities worth 2/3 of the mark (7 points) is considered "not evaluable".

The subject will be considered pass if the average of the five activities is equal to or greater than 5.

Prior to formally entering final marks, the lecturer will publish the date / time for assessment revision and the final mark. There is a procedure for resitting or making up evaluated activities, i.e. the subject has a schedule of retrievals before the establishment of the final mark, which will take place between the end of classes and the final evaluation date established by the Academic Office of the Faculty. This recovery may affect, if necessary, the five activities mentioned above.

The maximum mark that can be obtained if a student sits the reassessment exam is a 5.

In the event of a student committing any irregularity that may lead to a significant variation in the grade awarded to an assessment activity, the student will be given a zero for this activity, regardless of any disciplinary process that may take place. In the event of several irregularities in assessment activities of the same subject, the student will be given a zero as the final grade for this subject.

In the event that tests or exams cannot be taken onsite, they will be adapted to an online format made available through the UAB's virtual tools (original weighting will be maintained). Homework, activities and class participation will be carried out through forums, wikis and/or discussion on Teams, etc. Lecturers will ensure that students are able to access these virtual tools, or will offer them feasible alternatives.
