

Linguistics Applied to Language Pathologies

Code: 101731
ECTS Credits: 6

Degree	Type	Year	Semester
2500893 Speech therapy	OB	1	2

The proposed teaching and assessment methodology that appear in the guide may be subject to changes as a result of the restrictions to face-to-face class attendance imposed by the health authorities.

Use of Languages

Principal working language: catalan (cat)
Some groups entirely in English: No
Some groups entirely in Catalan: Yes
Some groups entirely in Spanish: No

Teachers

Io Salmons Llussa

Prerequisites

It is recommended that the students can read publications in English on subjects related to the contents of the course.

Objectives and Contextualisation

The goals of the course are mainly two: (1) to offer the basic knowledge to compare normal and impaired speech, and (2) to identify the linguistic features that characterize language and speech pathologies.

Competences

- Critically evaluate the techniques and instruments of evaluation and diagnosis in speech therapy, as well as its procedures of intervention.
- Demonstrate an understanding and correct use of the terminology and methodology of speech-therapy research.
- Demonstrate an understanding of disorders in communication, language, speech, hearing, voice and non-verbal oral functions.
- Evaluate the scientific production that supports speech therapists professional development.
- Identify, analyze and solve ethical problems in complex situations.
- Use the exploratory techniques and instruments pertaining to the profession, and register, synthesise and interpret the data provided by integrating this into an overall information set.

Learning Outcomes

1. Conduct an examination of language via the techniques of linguistics and use the results of this exploration to issue prognoses of evolution.

2. Correctly use the terminology of linguistics and psycholinguistics, as well as the nomenclature of language disorders.
3. Describe and explain the usefulness of techniques used in linguistics to assess language disorders.
4. Explain the linguistic characteristics of distinct language disorders.
5. Explain the linguistic characteristics of people with and without language disorders, described in scientific publications.
6. Identify, analyze and solve ethical problems in complex situations.

Content

1.- Introduction to clinical linguistics

2.- Phonetic analysis of disordered speech

The International Phonetic Alphabet and the articulatory classification of the speech sounds. Phonetic description of Catalan and Spanish. Phonetic transcription of disordered speech.

3.- Phonological analysis of disordered speech

Phonological analysis. Phonological description of Catalan and Spanish. Phonological analysis of disordered speech.

4.- Morphology, syntax and semantics in language and speech pathologies

The morphosyntactic and semantic structure of language. A linguistic model of language acquisition.

5.- Morphosyntactic and semantic analysis of language pathologies.

Developmental disorders: specific language disorder. Acquired disorders: aphasia. Other pathologies: Williams syndrome, Down syndrome, Autism Spectrum Disorder.

Methodology

The teaching methodology combines theoretical and practical sessions. The lectures cover the basic concepts needed to identify the linguistic features of language and speech pathologies, whereas the goal of the practical sessions is to apply the theoretical knowledge.

The proposed teaching and assessment methodologies may experience some modifications because of the restrictions on face-to-face learning imposed by the health authorities. The teaching staff will use the Moodle classroom or the usual communication channel to specify whether the different directed and assessment activities are to be carried out on site or online, as instructed by the faculty.

Annotation: Within the schedule set by the centre or degree programme, 15 minutes of one class will be reserved for students to evaluate their lecturers and their courses or modules through questionnaires.

Activities

Title	Hours	ECTS	Learning Outcomes
Type: Directed			
Lectures	21	0.84	3, 4, 5, 1, 2
Practical sessions	28	1.12	3, 4, 5, 1, 6, 2
Type: Autonomous			
Study of course content, readings, and search for additional information	95	3.8	3, 4, 5, 1, 6, 2

Assessment

The final mark of the course will be determined by the outcome of three assessment activities:

Ev1 - Face-to-face individual written exam on units 1, 2, and 3 of the course syllabus (35% of the final mark).

Ev2 - Face-to-face individual written exam on units 4 and 5 of the course syllabus (35% of the final mark).

Ev3 - Online individual written assessment on the content of compulsory readings (30% of the final mark).

These are the only three assessment activities taken into consideration to calculate the final qualification of the course. A mark of zero will be given for each assessment activity not taken. Students will successfully complete this course by getting an overall grade of 5 or higher.

Students who have submitted assessment evidences with a weight equal or greater than 40% of the total grade of the course could not be considered as 'non-assessable'.

At the time of each assessment activity, information will be provided on the procedure and the date for reviewing the grades.

In order to sit the reassessment exam, it is necessary to have obtained a mark between 3.5 and 4.9 and to have delivered a set of assessment evidences whose weight is equivalent to a minimum of the 2/3 of the total grading of the course.

Reassessment will consist of a final exam covering all the contents of the syllabus, including the compulsory readings. The mark of this exam will be the final qualification of the course.

No unique final synthesis test for students who enrol for the second time or more is anticipated.

In the event of a student committing any irregularity that may lead to a significant variation in the grade awarded to an assessment activity, the student will be given a 0 (zero) for this activity, regardless of any disciplinary process that may take place. In the event of several irregularities in assessment activities of the same subject, the student will be given a 0 (zero) as the final grade for this subject. (*Pautes d'avaluació de les titulacions de la Facultat de Psicologia 2021-22. Aprobats en Comissió Acadèmica el 19 d'abril de 2021.* https://www.uab.cat/doc/DOC_Pautes_Avaluacio_FP_2020).

Any student with problems to understand the written exams in Catalan may request the translation to Spanish formally to the teaching team by the week 4 of the semester at the latest.
