Use of Languages

Principal working language: catalan (cat)
Some groups entirely in English: No
Some groups entirely in Catalan: Yes
Some groups entirely in Spanish: No

Prerequisites

To have assimilated basic knowledge of evolutionary psychology. With knowledge of authors like Piaget, Vigotsky.

Have assimilated knowledge of reading and writing learning methods. Have assimilated knowledge of general linguistics.

Have assimilated knowledge of the evolution of language. Have a good command of written and spoken Catalan.

Objectives and Contextualisation

Know how to differentiate and identify a disorder in the acquisition of the language of an evolutionary stage and context.

Understand and know how to evaluate the appropriate objectives in the different oral and written language acquisition disorders.

Know and know how to select and use effectively the different general and specific assessment techniques in ear and hearing disorders.

Learn to understand and extract conclusions from evaluation reports of acquisition disorders of oral and written language.

To have a globalizing vision of the acquisition of language and its possible disorders, as well as the most appropriate interventions.

Competences

- Demonstrate an understanding and correct use of the terminology and methodology of speech-therapy research.

- Demonstrate an understanding of how the profession works, and the legal status of the speech therapist.
- Ethically commit oneself to quality of performance.
- Have a strategic and flexible attitude to learning.
- Managing communication and information technologies.
- Organise and plan with the aim of establishing a plan for development within a set period.
- Prepare and write reports on examination and diagnosis, monitoring, termination and referral
- Project design and management.
- Use non-verbal communication techniques to optimise communicative situations.
- Use the exploratory techniques and instruments pertaining to the profession, and register, synthesise and interpret the data provided by integrating this into an overall information set.
- Working in intra- and interdisciplinary teams.

Learning Outcomes

1. Analyse the results of a study on changes in the acquisition of oral or written language.
2. Demonstrate knowledge of the legal framework governing the speech-therapist profession in public education and health care.
3. Develop a written diagnosis and subsequent intervention for a case with disorders in the acquisition of oral or written language.
4. Discuss the validity of a study on changes in the acquisition of oral or written language.
5. Ethically commit oneself to quality of performance.
6. Have a strategic and flexible attitude to learning.
7. Managing communication and information technologies.
8. Organise and plan with the aim of establishing a plan for development within a set period.
9. Project design and management.
10. Select and apply specific instruments for the appropriate evaluation of disorders in oral or written language.
11. Use non-verbal communication techniques to optimise communicative situations.
12. Working in intra- and interdisciplinary teams.

Content

Block 1.: Disorders of the acquisition of oral language

1.1 Primary and secondary disorders. Differences

1.2 Delay of language. Definition Characteristics

1.3 L
anguage development disorder (LDD). Definition Classification

1.4 Differential Diagnosis: SSD-DLD-LDD, LDD -ASD

Block 2: Process of evaluation of oral language

2.1 Evaluation process

2.2. Assessment of language as a product

2.3. Evaluation of the language by processes

2.4 Pre-verbal evaluation

2.5 Evaluation of LDD

Block 3.: Specific learning disorders

3.1 Disorder of reading. Definition, Characteristics and classification

3.2 Writing disorder: Definition, Characteristics and classification

Block 4.: Assessment tests for specific learning difficulties

4.1 Reading and writing tests

4.2 Tests of basic learning devices

4.3 Screening tests

4.4 Specific tests

Methodology

The methodology will consist of lectures with explanations of the theoretical programme, which students must have jointly alternated with the viewing of practical cases; as well as practical classes with case exposure and presentation.

The training activities will be focused on real cases that will have to be evaluated from the observation of video material.

Students will have to carry out the administration of a large evaluation test of a subject and to make the presentation of the results.

N.B. The proposed teaching and assessment methodologies may experience some modifications as a result of the evolution of the curriculum.

Annotation: Within the schedule set by the centre or degree programme, 15 minutes of one class will be reserved for students to evaluate their lecturers and their courses or modules through questionnaires.

Activities

Title	Hours	ECTS	Learning Outcomes
Type: Directed			
Attendance to theoretical (43,5h) and practical classes (24h)	67.5	2.7	3, 8, 10, 6, 12, 7, 11
Type: Supervised			
Application, correction and interpretation of some tests and oral and / or written language tests, presented in writing	15	0.6	1, 4, 3, 10
Viewing cases with application of theoretical knowledge	30	1.2	1, 9, 3, 8, 10, 6
Type: Autonomous			
Practical case action	16	0.64	1, 5, 3, 10, 6, 11
Several lectures related to the theory blocks and elaboration of summaries and conclusions in writing or oral presentation in class	74.5	2.98	1, 4

Assessment

To pass the subject :

All the approved learning evidences must be graded with at least 5 out of 10.

The final grade will be the average of the grades with the weighting specified below. The evaluation will be carried out by the following evidences:

Ev. 2. Multiple choice examination of Blocs 1 and 2 (25% of the final grade) (first assessment period) individual and face to face

Ev. 4 .Multiple choice examination of blocks 3 and 4 (25% of the final grade) (second assessment period) individual and face to face

Ev. 3. Attendance at the practical seminars and the presentation of a summary of each of the sessions (30% of the final grade) group and face to face

Ev. 1. Test and the oral presentation in class (20% of the final grade) group and face to face

Students who have provided learning evidence with a weighting of less than 4 points (40%) will be considered an insufficient student.

No unique final synthesis test for students who enrol for the second time or more is anticipated.
