Use of Languages

Principal working language: spanish (spa)

Teachers

Melinda Dooly Owenby
Emilee Moore
Andy Morodo Horrillo
Maria Mont Algasasilla

Prerequisites

None.

Objectives and Contextualisation

In this module students, who are pre-service teachers, will learn about the main current theories, approaches and methods for teaching and learning a foreign language. In this module student-teachers will explore tools for designing, implementing and assessing teaching tasks that allow foreign language learners to develop, in formal learning environments, their interactive competences and related skills.

Competences

- Apply methodology for research, specific techniques and resources for researching and producing innovative results in a certain area of specialisation.
- Communicate and justify conclusions clearly and unambiguously to both specialist and non-specialist audiences.
- Continue the learning process, to a large extent autonomously.
- Identify and interpret the main teaching theories for second languages and apply them to Chinese for Spanish speakers.
- Relate research in language teaching and learning with teaching practice or learning processes observed in the classroom to make suggestions for improvements from both a theoretical and practical point of view.
- Work individually and in a team and be able to analyse, interpret and synthesise the information generated.

Learning Outcomes

1. Analyse and apply teaching approaches that seek to develop multilingual and intercultural competence.
2. Analyse curricular content thoroughly in search of ways to work on the language with learners of different levels.
3. Apply methodology for research, specific techniques and resources for researching and producing innovative results in a certain area of specialisation.
4. Choose and evaluate texts, tools and resources oral, written and multimodal as instruments for learning.
5. Communicate and justify conclusions clearly and unambiguously to both specialist and non-specialist audiences.
6. Continue the learning process, to a large extent autonomously.
7. Identify and describe the main theories on foreign-language learning.
8. Know the principles underpinning the teaching and learning of a foreign language.
9. Reflect on the assessment types, guidelines and criteria for the different linguistic and communicative competences.
10. Work individually and in a team and be able to analyse, interpret and synthesise the information generated.

Content

The contents of this course will be organised into 5 blocks:

Block 1: Language learning and social interaction. Current foreign language learning theories, methods and approaches. The notion of interactive competence and didactics of plurilingualism.

Block 2: The development of communicative skills. Resources and materials to stimulate participation, promote communication and evaluate the learning process.

Block 3: Competence-based learning. Tools and strategies for evaluating and fomenting student autonomy.

Block 4: Resources for teaching children a foreign language.

Block 5: Language learning tasks. Technological tools to support the learning of foreign languages

Methodology

All of the blocks in this module are based on highly participative sessions in a combination of teacher lectures and group and individual activities done in class. The lessons build on required texts so students should come to class prepared to discuss and engage with the assigned reading and other resources.

Annotation: Within the schedule set by the centre or degree programme, 15 minutes of one class will be reserved for students to evaluate their lecturers and their courses or modules through questionnaires.

Activities

Title	Hours	ECTS	Learning Outcomes
Type: Directed			
Debates	15	0.6	5, 9
Lectures	23	0.92	8, 7
individual, pair-work and group work tasks	25	1	2, 1, 4, 10
Type: Supervised			

Preparation of classroom assignments	25	1	1, 3, 10
Type: Autonomous			
Microteaching preparation	60	2.4	2, 1, 3, 4, 10
Preparation of the written assignment based on the microteaching	40	1.6	1, 3, 5, 6, 10
Reading Course Literature	60	2.4	8, 7, 6, 10
Test Preparation	40	1.6	7, 5, 9, 10

Assessment

Students are expected to take an active role in the lessons and carry out the tasks proposed by the teachers in a timely manner.

Students will also be given a test to demonstrate full synthesis of the theoretical contents and will design, in groups, a short teaching activity that makes use of this knowledge in a practical way. This will be accompanied with a written summary of the teaching activity and a simulation (microteaching).

Assessment Activities

Title	Weighting	Hours	ECTS	Learning Outcomes
Active participation in class	15%	0	0	2, 3, 10
Microteaching	40%	4	0.16	1, 5, 10
Test on module content	20%	2	0.08	8, 7, 9
Written assignment based on the microteaching	25%	6	0.24	3, 6, 4, 10
