Use of Languages

Principal working language: spanish (spa)
Some groups entirely in English: Yes
Some groups entirely in Catalan: Yes
Some groups entirely in Spanish: Yes

Prerequisites

This is an optional subject of 12 ECTS of the fourth year of the degree. As a requirement to apply, you must have completed the first year and 120 ECTS from the first three years, be enrolled at the time of starting the stay and have paid the accident and civil liability insurance provided in the fee regulations.

Objectives and Contextualisation

This optional course must be preferably taken during the fourth year or in the summer after completing the activities programmed for the third year of the degree.

The objectives of the subject are:

- To promote the student's integration in companies, hospitals or research groups, either in a public or a private entity.
- To learn and to apply Genetics' techniques that are currently used in an industrial ambit or in research projects.
- Prepare a report of the internship experience.

Competences

- Adapt to new situations.
- Apply knowledge of theory to practice.
- Apply scientific method to problem solving.
- Appreciate the importance of quality and a job well done.
- Assume ethical commitment
- Be able to analyse and synthesise.
- Be able to communicate effectively, orally and in writing.
- Be able to organise and plan.
- Be sensitive to environmental, health and social matters.
- Design experiments and interpret the results.
- Develop creativity.
- Develop self-directed learning.
- Integrate knowledge and skills to produce an academic or professional study on genetics.
- Make decisions.

- Reason critically.
- Take the initiative and demonstrate an entrepreneurial spirit.
- Use and manage bibliographic information or computer or Internet resources in the field of study, in one's own languages and in English.
- Work in an international context.
- Work individually and in teams.

Learning Outcomes

1. Adapt to new situations.
2. Apply knowledge of theory to practice.
3. Apply scientific method to problem solving.
4. Appreciate the importance of quality and a job well done.
5. Assume ethical commitment
6. Be able to analyse and synthesise.
7. Be able to communicate effectively, orally and in writing.
8. Be able to organise and plan.
9. Be sensitive to environmental, health and social matters.
10. Design experiments and interpret the results.
11. Develop creativity.
12. Develop self-directed learning.
13. Integrate and apply knowledge and skills in the professional field of genetics.
14. Make decisions.
15. Reason critically.
16. Take the initiative and demonstrate an entrepreneurial spirit.
17. Use and manage bibliographic information or computer or Internet resources in the field of study, in one's own languages and in English.
18. Work in an international context.
19. Work individually and in teams.

Content

The content of the subject is variable, as it will depend on the entity where the internship is done. However, the content will always be closely related to Genetics. In order to perform an activity related to the field of Genetics, the coordinator of the course must give his/her approval to the internship proposed by the student.

Hi ha dues modalitats de pràctiques:

- Places oferides internament per la UAB, on els estudiants tindran un tutor acadèmic.
- Places proposades per l'alumne, on els estudiants seran tutoritzats per un membre de l'equip docent de l'assignatura i per un tutor extern.

There are two types of internships:

- Posts internally offered by UAB, in which students will have an academic tutor.
- Posts proposed by the student, in which students will be tutored by a member of the course's teaching team and by an external tutor.

*Unless the requirements enforced by the health authorities demand a prioritization or reduction of these contents.

Methodology

The internship may be done in three different periods (summer, first and second semester). The duration of each period will be made public every academic year on the website of the Faculty of Biosciences. At the time

of choosing the period, it is necessary to take into account that the delivery date of the report, as it should be at least 2 weeks before the closing of the course transcript.

The student will find all the general and specific information related to this subject on the website of the Faculty entitled Academic Practices of Degree and in the Academic Practices section of the Virtual Campus. In addition, the Faculty and/or the professor in charge of the subject will organize a general informative session destined mainly to the students of the third and fourth year.

In addition, the student will also find all the information related to this subject, how to formalize the request and all the procedures derived from the adjudication of the internship post in the Faculty's web page titled "Academic Practices in Entities".

*The proposed teaching methodology may experience some modifications depending on the restrictions to face-to-face activities enforced by health authorities.

Annotation: Within the schedule set by the centre or degree programme, 15 minutes of one class will be reserved for students to evaluate their lecturers and their courses or modules through questionnaires.

Activities

| Title | Hours | ECTS | Learning Outcomes |
|------------------|-------|------|---|
| Type: Supervised | | | |
| Internship | 280 | 11.2 | 1, 3, 2, 5, 9, 12, 11, 10, 13, 14, 16, 15, 7, 6, 8, 18, 19, 17, 4 |

Assessment

The course's assessment will consist of two parts:

- 1) Student's final report (40% of the final grade). The report will be evaluated by a member of the course's evaluation committee.
- 2) The Academic Tutor / External Tutor's evaluation of the student (60% of the final grade). The tutor has the power over the student's evaluation and can only be modified in cases where strong evidence of its impartiality is presented.

Indicators for the evaluation of the final report (weight 40%)

- Following the instructions for the preparation of the final report and the adequacy of the contents in the different sections.
- Research and selection of information. Correct citation of the bibliography.
- Written communication.
- Synthetic capacity.
- Critical capacity.
- The quantity and quality of the work carried out will be assessed globally.
- The correct use of English will be valued positively.

Regulations for the preparation of the final report

The final report is personal. The extension of the final report will have a maximum of 15 pages, without including the cover. It will be written in Word or equivalent format with 1.5 line spacing, Verdana font of size 10, and the number of each page will be indicated.

The final report must consist of the following sections:

- Cover: Title, name of the student, the tutor(s) and the research group(s), the time period of the internship and date of delivery to the responsible professor.
- Index
- Theoretical introduction or technology in which the work is framed. It is necessary to include bibliographical references.
- Work aim(s)
- Description of the entity.
- Methodologies used by the student. It is requested to include bibliographical references. Work schedule.
- Description of the results.
- Application of regulations, ethical and environmental aspects, if applicable.
- Bibliography.
- ANNEX 1. This annex of the report should only be given to the person in charge of the subject or the member of the teaching staff that evaluates the report and will consist of two sections:
 - Evaluation of the entity or research group and suggestions for improvement.
 - Personal assessment of the student's contribution, taking into account their professional future.

The final report will be delivered electronically in PDF format to the course's coordinator a maximum of 15 days after the end of the internship and a maximum 15 days before the closing of the course's transcript. Exceptional cases must be authorized by the course coordinator.

The course coordinator must receive the tutor's evaluation and the report written by the student in order to assess the student's work. In the case of not meeting one of these requirements, the final grade will be "Not assessable".

Total or partial plagiarism in the development of the report will result in a 0.

The Regulations of the subject, which includes the instructions for the preparation of the final report, can be found on the Faculty's "Academic Practices in Entities" website.

*Student's assessment may experience some modifications depending on the restrictions to face-to-face activities enforced by health authorities.

Assessment Activities

| Title | Weighting | Hours | ECTS | Learning Outcomes |
|--------------------------|-----------|-------|------|---|
| Final Report | 40% | 20 | 0.8 | 1, 3, 2, 5, 9, 12, 11, 10, 13, 14, 16, 15, 7, 6, 8, 18, 19, 17 |
| Tutor's final evaluation | 60% | 0 | 0 | 1, 3, 2, 5, 9, 12, 11, 10, 13, 14, 16, 15, 7, 6, 8, 18, 19, 17, 4 |

Bibliography

The Bibliography will depend on the specific task that each student will do during their internship according to what they need to prepare the final report.

Software

No specific software is available.
