Methodology

The proposed teaching methodology may undergo some modifications according to the restrictions imposed by the health authorities on on-campus courses

The activities that allow the students to achieve the objectives of the course will be:

1. Theoretical classes with professors will develop the main concepts

The aim of this activity is to present the most important concepts of the material, the necessary basic demonstrations and the aspects that are usually made more mistakes in the application of the theoretical concepts.

2. Practical classes

The teacher will present questions and doubts that will be resolved jointly by posing the usual errors the students make.

3. Resolution of questions by students

Each topic will be associated with a list of questions that will be resolved individually. Serveix to assimilate the theoretical concepts exposed to class.

Periodically they will comment in the practical classes on the resolution of these questions.

4. Face-to-face tutorials

The student has a few hours with the professors of the subject to resolve their theoretical and practical doubts in person.

Annotation: Within the schedule set by the centre or degree programme, 15 minutes of one class will be reserved for students to evaluate their lecturers and their courses or modules through questionnaires.
