

**Spanish Morphology**

Code: 106366  
ECTS Credits: 6

Degree	Type	Year	Semester
2504211 Spanish Language and Literature	OB	2	1

**Contact**

Name: Cristina Buenafuentes de la Mata  
Email: cristina.buenafuentes@uab.cat

**Use of Languages**

Principal working language: spanish (spa)  
Some groups entirely in English: No  
Some groups entirely in Catalan: No  
Some groups entirely in Spanish: Yes

**Teachers**

Ziwen Wang  
Matthias Ulrich Raab

**Prerequisites**

By obtaining the minimum of credits in basic training subjects, students have demonstrated to have acquired the basic competences and they will be able to express themselves orally and in writing.

For this reason, any spelling and expression errors that may be committed will lead to a score decrease in the final grade.

It is also expected that students know the general rules of submission of an academic work. However, students could apply the specific rules that the teacher of the subject may indicate to them, if they deem it necessary.

**Objectives and Contextualisation**

The subject of "Morphology of Spanish" has as its fundamental objective to offer a general vision of the study of words and words classes. It is recommended that the student has previously attended the subject "Introduction to the Spanish language".

At the end of the course, the student must be able to:

- Know the different theoretical models of morphology.
- Identify the constituents of a word and the levels in which they operate.
- Master the aspects related to inflection and its implications.
- Recognize the word formation processes and their characteristics.
- Understand the particularities of the main classes of words.

**Competences**

- Analyse the main phonetic, phonological, morphological, syntactic, lexical and semantic properties of the Spanish language, its evolution throughout history and its current structure.

- Develop arguments applicable to the fields of Hispanic literature, literary theory, Spanish language and linguistics, and evaluate their academic relevance.
- Introduce changes in the methods and processes of the field of knowledge to provide innovative responses to the needs and demands of society.
- Students can apply the knowledge to their own work or vocation in a professional manner and have the powers generally demonstrated by preparing and defending arguments and solving problems within their area of study.
- Students must be capable of communicating information, ideas, problems and solutions to both specialised and non-specialised audiences.
- Use digital tools and specific documentary sources to gather and organise information.

## Learning Outcomes

1. Acquire in-depth phonetic knowledge so that it can be applied to other interdisciplinary fields.
2. Characterise linguistic phenomena taking into account the different levels of analysis.
3. Describe the phonological system of Spanish on the basis of the distribution, relationships and articulatory and acoustic properties of its elements.
4. Identify and describe the syntactic constructions of Spanish.
5. Identify the constituents of a word and the levels at which they operate.
6. Justify by means of appropriate terminology the analysis of data from a linguistic point of view.
7. Make linguistic predictions and inferences about the content of a text.
8. Propose new ways of measuring success or failure in the implementation of proposals or innovative ideas.
9. Recognise acoustically and articulately the sounds and prosody of Spanish.
10. Recognise the links between compositional semantics and other disciplines, both linguistic (syntax, lexicology, pragmatics) and non-linguistic (philosophy, logic, mathematics).
11. Use digital tools to obtain, classify, interpret and analyse relevant data related to the study of Spanish language and literature.
12. Use the appropriate terminology in the construction of an academic text and in the transmission of their knowledge.
13. Use traditional sources to obtain, classify, interpret and analyse relevant data related to the study of Spanish language and literature.

## Content

Lesson 1. The morphology: Units of analysis

Lesson 2.- Inflectional morphology

Lesson 3.- Word Formation

Lesson 4.- Classes of words

## Methodology

Students must carry out a continuous follow-up of the subject:

In order to achieve the aforementioned objectives, theoretical explanations will be combined by the teacher with the practical realization of exercises in the classroom and comments on the compulsory readings.

The learning of this subject is distributed as follows:

- Directed activities (35%, 55,5 hours). These activities are divided into master classes and seminars and classroom practices led by the teacher, in which theoretical explanation is combined with performance of exercises.
- Supervised activities (10%, 15 hours). These tutorials are programmed by the teacher, dedicated to correcting and commenting on problems at different levels of literary analysis.

- Autonomous activities (50%, 75 hours). These activities include both time devoted to individual study as well as performance of exercises and reading of the mandatory bibliography.
- Evaluation activities. The evaluation of the subject will be carried out through written tests and practical activities.

Annotation: Within the schedule set by the centre or degree programme, 15 minutes of one class will be reserved for students to evaluate their lecturers and their courses or modules through questionnaires.

## Activities

Title	Hours	ECTS	Learning Outcomes
Type: Directed			
Master classes, seminars and practical sessions	55.5	2.22	2, 7, 12, 11, 13, 5, 4, 6, 10
Type: Supervised			
Programmed tutorials	15	0.6	2, 12, 11, 13, 5, 4, 6, 8, 10
Type: Autonomous			
Autonomous activity	75	3	2, 7, 12, 11, 13, 5, 4, 6, 8, 10

## Assessment

The faculty will evaluate this subject on an ongoing basis. The evaluation of the subject will be carried out, therefore, starting from the realization of five activities / tests in which the following aspects will be evaluated:

- The assimilation of theoretical contents;
- the practical application of the contents;
- the adaptation to the requirements of the activity in question

The three activities/tests to be carried out are the following:

- 1 theoretical and practical test for topic 1 (40%)
- 1 practical evaluation activity theoretical test for topics 2 and 3 (40%)
- 1 theoretical test for topic 4 (20%)

To pass the subject all the evaluation activities must be done. The final grade, once all the notes have been added and the percentages indicated above applied, must be equal to or greater than 5.

The completion of spelling, expression, lexicon and syntax will have a penalty of 0.2 each, without limit, on the final grade in the activities and exams. Repeated faults also discount.

In the event of a student committing any irregularity that may lead to a significant variation in the grade awarded to an assessment activity, the student will be given a zero for this activity, regardless of any disciplinary process that may take place. In the event of several irregularities in assessment activities of the same subject, the student will be given a zero as the final grade for this subject.

### No-evaluable

The student will be considered "not evaluable" if submitted only 40% of the evaluable evidence. The elaboration of more than 41% of the tests will mean, then, the will of the student to be evaluated in the subject and, therefore, his presentation to the evaluation.

### Re-evaluation

All evaluation activities are recoverable. However, the student will lose the right to reassess if the average of the tests performed with the corresponding percentage is less than 3.5 points. If the student has the right to reassessment, he can only reassess at most two tests. Moreover, it should be taken into account that in order to be eligible for re-evaluation, students are obliged to attend all the evaluable tests.

In the event that tests or exams cannot be taken onsite, they will be adapted to an online format made available through the UAB's virtual tools (original weighting will be maintained). Homework, activities and class participation will be carried out through forums, wikis and/or discussion on Teams, etc. Lecturers will ensure that students are able to access these virtual tools, or will offer them feasible alternatives.

## Assessment Activities

Title	Weighting	Hours	ECTS	Learning Outcomes
Practical evaluation activity	40%	1.5	0.06	2, 12, 5, 6, 10
Theoretical and practical test	40%	1.5	0.06	1, 2, 3, 7, 12, 11, 13, 5, 6, 8, 9, 10
Theoretical test	20%	1.5	0.06	2, 7, 12, 11, 13, 4, 6, 10

## Bibliography

The professor will indicate during the course the mandatory and recommended readings for each item of the agenda.

## Software

In this course it is not necessary to use specific computer programs.
