the requirements are the same that are mandatory to study the mater's degree

## Objectives and Contextualisation

The objective of this module is to achieve a previous homogenisation of the general knowledge of the european integration process, and about the aspects and elements that characterize the EU. By this module the students will obtain the basic and essential knowledge that will be the basis for their access and success to the modules of specialisation. This module is a reflection of one of the fundamental values of the master: the interdisciplinarity. For this reason this subject is considered as a mandatory module for all students.

## Competences

- Analyse, synthesise, organise and plan projects and assignments related to the area of study.
- Continue the learning process, to a large extent autonomously
- Seek out information in the scientific literature using appropriate channels, and use this information to formulate and contextualise a research topic.

- Solve problems in new or little-known situations within broader (or multidisciplinary) contexts related to the field of study.
- Understand how EU legal and political measures are adopted, and how to interpret and apply them.
- Understand how the different EU policies are drawn up and how they interrelate.
- Understand the workings of EU institutions in order to work and collaborate with them.
- Work in multidisciplinary teams.
