Teaching groups languages

You can check it through this [link](#). To consult the language you will need to enter the CODE of the subject. Please note that this information is provisional until 30 November 2023.

Prerequisites

It is highly recommended to have passed the subject "Scientific Research in Criminology".

Objectives and Contextualisation

- To understand the epistemological foundations of qualitative social research.
- To know how to use qualitative methods in criminological research
- To know how to use qualitative data collection techniques.
- To know how to use content analysis methods.

Competences

- Ability to analyse and summarise.
- Applying the quantitative and qualitative data collection techniques in the criminological field.
- Clearly explaining and arguing a carried out analysis about a conflict or crime problem and its responses in front of specialised and non-specialised audiences.
- Designing a criminological research and identifying the appropriate methodological strategy to the proposed goals.
- Drawing up an academic text.
- Formulating research hypothesis in the criminological field.
- Using research methods in social sciences in order to diagnose criminality problems.
- Verbally transmitting ideas to an audience.
- Working autonomously.

- Working in teams and networking.

Learning Outcomes

1. Ability to analyse and summarise.
2. Applying the quantitative and qualitative data collection techniques in the criminological field.
3. Choosing the appropriate research methodology in criminological works.
4. Designing criminological research projects with well-drawn hypothesis.
5. Diagnosing a criminal process through the scientific method.
6. Drawing up an academic text.
7. Transmitting in a reasoned manner the results of a criminological research.
8. Verbally transmitting ideas to an audience.
9. Working autonomously.
10. Working in teams and networking.

Content

1. Basics of qualitative methodology.
 - 1.1. Epistemological issues in Social Sciences.
 - 1.2. Genesis and evolution of the hermeneutic perspective.
 - 1.3. Basic features and types of qualitative methods.
2. Designing a qualitative research.
 - 2.1. Foundations of the analysis model.
 - 2.2. Delimitation of the field of analysis, sampling and recruitment.
 - 2.3. Sociostructural saturation and informative saturation.
3. Interview technique.
 - 3.1. Typology of interviews.
 - 3.2. The interview script.
 - 3.3. Communicative dynamics.
4. The biographical method.
 - 4.1. Concept and typologies.
 - 4.2. Analytical times.
 - 4.3. Interpretation levels.
5. The content analysis.
 - 5.1. Basics.
 - 5.2. Coding and analysis units.
 - 5.3. Axes interpretation of the data.
6. Focus group technique.
 - 6.1. Concept and analytical design.
 - 6.2. Group dynamics.
 - 6.3. Typology and application.
7. Observation technique and ethnographic method.
 - 7.1. Observation types.
 - 7.2. The ethnographic method.

Methodology

The achievement of the competences of the course will be provided through the following activities:

- Lectures.
- Practical seminars, to complement and deepen the contents of lectures, as well as to make a practical application of them.

- Supplementary work activities inside and outside the classroom, including:

- a) Basic readings.
- b) Practical exercises (evaluable and non-evaluable).
- c) A group work oriented to apply the contents of the subject.

All practical exercises will be reviewed and commented by the teacher. There will be regular tutorials with the teacher regarding group work.

Attendance at a minimum of 80% of the classes, both to lectures and seminars, is mandatory.

In the Virtual Campus, from the beginning of the course, the schedule of the sessions of the classroom will appear.

Annotation: Within the schedule set by the centre or degree programme, 15 minutes of one class will be reserved for students to evaluate their lecturers and their courses or modules through questionnaires.

Activities

| Title | Hours | ECTS | Learning Outcomes |
|---|-------|------|----------------------------|
| Type: Directed | | | |
| Lectures | 18 | 0.72 | 2, 5, 4, 3, 1 |
| Practical exercises and simulation of cases. | 18 | 0.72 | 2, 5, 4, 3, 1, 7, 8, 9, 10 |
| Type: Autonomous | | | |
| Readings, analysis and synthesis of the material. | 60 | 2.4 | 2, 1, 9 |
| Work group | 49 | 1.96 | 2, 5, 4, 3, 6, 1, 7, 9, 10 |

Assessment

a) Continuous Assessment:

- Theoretical-practical exam: 50%
- Group work: 40%
- Evaluable practical exercises: 10%

To pass the subject a minimum average mark of 5 is required. However, in order to pass a minimum of 4 out of 10 is required in each part of the evaluation.

If students fail in group work or in the exam they will have a chance of reassessment, but in case of passing the maximum mark will be 5 out 10.

If unexcused or excused out of time absences (two weeks from the absence) exceed 20% of the total number of seminar classes, students will not be evaluated. Only absences due to illness, due to force majeure, or for academic reasons previously authorized by the teaching staff will be justified.

Students who cheat during the exam will get a fail mark (with a note=0), losing the possibility of recuperation.

In case of plagiarism in the writing of practical exercises or works, a zero will be obtained and a warning will be received. In case of repetition of the behavior, the student will suspend the subject (with a 0) and will lose the right to reassessment.

Classes start on time. Late arrival is not admitted, nor exit before its completion, except for reasonable justification.

b) Single Assessment:

- Theoretical-practical exam: 60%

- Bibliography to prepare the exam: mandatory bibliography.

- Individual work: 40%

- The work will be done throughout the semester, following the instructions that will appear on the virtual campus, and will be delivered and presented orally (maximum 15 minute presentation) on the day of the final exam.

c) General aspects of the assessment system

To pass the subject a minimum average mark of 5 is required. However, in order to pass a minimum of 4 out of 10 is required in each part of the evaluation.

If students fail in the exam or in the work they will have a chance of reassessment, but in case of passing the maximum mark will be 5 out 10.

Students who cheat during the exam will get a fail mark (with a note=0), loosing the possibility of recuperation.

Assessment Activities

| Title | Weighting | Hours | ECTS | Learning Outcomes |
|------------------------|-----------|-------|------|----------------------------|
| Group work | 40% | 0 | 0 | 2, 5, 4, 3, 6, 1, 7, 9, 10 |
| Individual examination | 50% | 5 | 0.2 | 2, 5, 1, 9 |
| Practical exercises | 10% | 0 | 0 | 2, 5, 4, 3, 1, 8, 9, 10 |
