Methodology

The learning process is based on the work of the student, who learns by doing, being the lecturer's task to help by supplying information and showing where the juridical sources can be obtained.

The teaching of the matter and the student's training and learning process is based on the following activities:

1. Activities directed by the lecturer:

1.1 Lectures: the student can reach the fundamentals, the legal framework and the leading cases of the subject matter. These lectures are the kind of activities in which less interactivity is required from the student and are conceived as a fundamentally one-direction method of transmitting knowledge on the side of the lecturer.

1.2 Practical workshops: the student will be focussed on solving real cases on tort law, discussing and commenting on news related to the subject or legal texts, making diagrams, etc. The specific content of these activities will be determined by the lecturer of each group.

2. Activities supervised by the lecturer: activities that can be carried out autonomously, but which require a minimum of supervision of the lecturer (tutorials, assistance in work, etc.).

3. Students autonomous activities:

3.1. Preparation of legal documents: Analyzing of leading cases proposed in advance by the lecturer extracted from court judgments. An exam is also proposed as an autonomous activity, the type of which will be determined by the lecturer at the start of the academic year.

3.2. Search of bibliography and leading cases as a good preparation for the exam.

3.3. Comprehensive reading of legal texts: Legal texts may be judgments, rules, journal articles or monographs, in addition to the recommended Handbooks. The specific material will be determined by the lecturer during the academic year.

Part of the legal material available to the student will be delivered through the moodle.

Annotation: Within the schedule set by the centre or degree programme, 15 minutes of one class will be reserved for students to evaluate their lecturers and their courses or modules through questionnaires.
