Assessment

This subject does not offer the option for comprehensive evaluation.

The evaluation of the student will consist of the following activities:

- 1.- Assistance, participation, exercises and follow-up (10% of the total grade).
- 2.- First partial test of continuous evaluation of topics 1 to 4 (20% of the total grade).
- 3.- Second partial test of continuous evaluation of the subjects 5 to 8 (20% of the total grade).
- 4.- Final test of the entire syllabus of the subject (50% of the total grade).

A student will be considered "not evaluable" in the subject as long as he has not taken any of the evaluation tests (test and final test). If any of them are carried out, it can no longer be considered "non-evaluable".

Calendar of evaluation activities

The dates of the different evaluation tests (partial exams, exercises in the classroom, delivery of works, ...) will be announced well in advance during the semester.

The date of the final exam of the subject is scheduled in the examination calendar..

"The programming of the evaluation tests cannot be modified, unless there is an exceptional and duly justified reason for which an evaluation act cannot be carried out. In this case, the people responsible for the degrees, after asking the teaching staff and the affected students, will propose a new programming within the corresponding academic period." Section 1 of Article 115. Calendar of evaluation activities (UAB Academic Regulations).

If students need to change an evaluation date, must submit the request by filling out the Application for reprogramming test:

https://eformularis.uab.cat/group/deganat_feie/reprogramacio-proves

Procedure of review of the qualifications

Coinciding with the final exam, the day in which the final grades will be published will be announced. In the same way, the procedure, place, date and time of the review of exams will be informed in accordance with the regulations of the University.

Recovery Exam

"All students are required to perform the evaluation activities. If the student's grade is 5 or higher, the student passes the course and it cannot be subject to further evaluation. If the student grade is less than 3.5, the student will have to repeat the course the following year. Students who have obtained a grade that is equal to or greater than 3.5 and less than 5 can take a second chance exam. The lecturers will decide the type of the second chance exam. When the second exam grade is greater than 5, the final grade will be a PASS with a maximum numerical grade of 5. When the second exam grade is less than 5, the final grade will be a FAIL with a numerical grade equal to the grade achieved in the course grade (not the second chance exam grade).

A student who does not perform any evaluative task is considered "not evaluable", therefore, a student who performs a continuous assessment component can no longer be qualified with a "not evaluable"."

Irregularities in evaluation acts

Notwithstanding other disciplinary measures deemed appropriate, and in accordance with current academic regulations, "in the event that the student makes any irregularity that may lead to a significant variation in the grade of an evaluation act, this evaluation act will be graded with 0, regardless of the disciplinary process that can be instructed. In case of several irregularities in the evaluation acts of the same subject, the final grade of this subject will be 0". Section 10 of Article 116. Evaluation results. (UAB Academic Regulations).

To participate in the recovery process, students must have been previously evaluated in a set of activities that represent a minimum of two thirds of the total grade of the subject or module.

The proposed evaluation activities may undergo some changes according to the restrictions imposed by the health authorities on on-campus courses.
