Methodology

Statement: Teaching and assessment methods may be submitted to change in case health authorities impose restrictions to access to campus.

The course has 6 ECTS credits, therefore it is expected that the students devote 150 working hours for this course, divided into different types of activities, each of them with a specific amount of working hours. This diversity of formats is reflected in the use of different working methodologies during the course:

- Guided activities are activities done in the classroom with the presence of the teacher, and will include: lectures (with ICT support and the possibility of forming discussion groups for specific topics); seminars for discussing the required readings, for focusing on practical issues and for analysing specific cases, problems and examples related to the course' syllabus. For these activities there will be specific readings, which will be announced well in advance. These activities represent one third of the total working hours required for the course (50 hours).

- Supervised activities are the ones carried out by the students outside the classroom, according to a work plan designed and supervised by the lecturer. Supervised activities also include individual tutorials and similar activities to assess each student's progress. These activities represent approximately 10% of the required working hours (15 hours).

- Autonomous activities are all the activities that the students do on their own, and in accordance with the requirements of the course. These activities may include supplementary research and reading, study their class notes, and all the activities that supplement their work during the course. These activities account for half of the student' working time (75hours).

Annotation: Within the schedule set by the centre or degree programme, 15 minutes of one class will be reserved for students to evaluate their lecturers and their courses or modules through questionnaires.

Assessment

The assessment will be based on a final exam (50%) and ten evaluable activities (50%). The final assessment is the result of the arithmetic average calculation of all the evaluative activities. At the beginning of the course, the professor will inform about the activities and their schedule. Only those students who don't pass the assessment of the subject as a whole, having obtained a mark on the exam of at least 3 out of 10, will be eligible for the reassessment exam. The reassessment will be based on an exam.

Unique Evaluation

The unique evaluation will consist of the following:

- Written exam with 10 short questions about the theoretical content of the subject: 50% of the final grade.
- Practical case 1 related to the application of the theoretical content of the subject: 25% of the final grade.
- Practical case 2 related to the application of the theoretical content of the subject: 25% of the final grade.

If the unique evaluation is failed, a reevaluation can be done following the same model.

The request for a unique evaluation implies renouncing continuous assessment.
