Timothy Kaldas Kaldas

Prerequisites

It has no academic prerequisites.

Students must have the habit of reading, watching, listening to and consulting different media of general and international information, especially following news of an international policy nature, as well as opinion articles on global political issues understood in their broadest sense.

Objectives and Contextualisation

This subject has a basic training character.

This means that it serves as a basis from which to be able to analyze international reality.

The basic objectives of the course are:

1. Know and understand the fundamental concepts of the discipline;
2. Acquire analytical skills applicable to international, transnational and global processes;
3. Understand and be able to delve into the processes, structures and developments that have shaped contemporary international society on a global scale: from colonialism or the development of capitalism to current neoliberal agendas and populisms;
4. To be able to express and defend orally and in writing their views on the various most relevant international issues.

Competences

- Apply theoretical trends and classical and recent analytical approaches to international relations in practical case studies.
- Assess the social, economic and environmental impact when acting in this field of knowledge.
- Contrast the main contemporary political theories.
- Describe the origin and development of the main current social, political and economic conflicts.
- Distinguish between and analyse the type of relations that have been established over the last century among the different social, political and economic agents on national, regional and international frameworks.
- Explain and summarise knowledge acquired in English language at an advanced level.
- Identify the main actors, structure and functioning of political systems in the internal and international sphere from a theoretical or applied perspective.
- Integrate historical, political and economic knowledge in the search for global solutions to current world problems.
- Manage and apply data to solve problems.
- Students must be capable of communicating information, ideas, problems and solutions to both specialised and non-specialised audiences.
- Students must develop the necessary learning skills to undertake further training with a high degree of autonomy.
- Work cooperatively in multidisciplinary and multicultural teams implementing new projects.

Methodology

The study of this course is divided into several types of activities, each with a certain number of working hours. We will use different methodologies:

- Classroom activities: lectures; sessions to debate the readings; and case discussions related to the syllabus of the course will be conducted.
- Supervised activities carried out by students outside the classroom in accordance with a designed workplan and subsequently tutored and evaluated by the faculty. Students must: read and prepare texts; do group work consisting of gathering documentation on a specific topic of international relations.
- Independent activities that students do on their own and in accordance with the requirements of the subject, from revising their class notes to reading academic papers or following current affairs and international issues.

Note: 15 minutes of a class will be used, according to the calendar established by the center / degree, for the students' surveys of evaluation of the performance of the professors and of evaluation of the subject / module.

Annotation: Within the schedule set by the centre or degree programme, 15 minutes of one class will be reserved for students to evaluate their lecturers and their courses or modules through questionnaires.

Assessment

EVALUATION

The subject will be assessed by:

1. The realization of two written exams covering the theoretical and practical content. Each exam contributes 25% of the final grade (50% in total). The minimum grade for the average of both exams has to be five points (over ten). Less than an average of 5 is a Fail for the subject.
2. The submission of a group work written and defended orally (20% of the total of the final note of the asignatura). A grade of 5 or more is a requirement to pass the course.
3. The readings and written papers on a series of texts (the guidelines and criteria for the reading of the texts will be indicated during the course), submitted or presented and discussed in class (15%).
4. Likewise, the participation of the students (active participation in class, comments, discussion of texts, oral presentations, etc.) represents 10% of the final mark of the subject.

The date of the written exams, and other assessments in class will be specified at the beginning of the semester and through the Virtual Campus.

Students who fail the total grade with 3.5 or more have the right to take part in the compensation activities (retake). With the compensation students pass with a maximum of five points out of ten, and as long as they have submitted at least two thirds of the evaluation activities.

Plagiarism or the use of artificial intelligence to write the assignments will entail a 0 on the activity.

Attending more than a third of the assessment activities excludes the students from the "non-assessable" qualification.

UNIQUE ASSESSMENT

The unique assessment process will be based on three activities:

- Written Exam 50%
- Written Project Assignment 25%
- Reading Review Assignment 25%
