A communicative approach will be employed: this approach focuses on the ability to communicate in the language rather than on grammatical accuracy or pronunciation. Based on this methodology, different types of activities will be conducted depending on the topic covered in each session:

- Debates based on video viewing or listening to audio materials (e.g., podcasts)
- Role-plays on specific topics
- Group conversations
- Activities to practice vocabulary and colloquial expressions
- Oral presentations in Chinese by students

- Technology in the classroom: the use of technological tools will be incorporated to enhance oral expression. For example, language learning applications, voice recording and playback software for improving pronunciation, and even interactive language games
- Autonomous practice: students will be encouraged to practice autonomously, using resources such as language exchange programs, encounters with native speakers, watching movies, or listening to music in Chinese

Annotation: Within the schedule set by the centre or degree programme, 15 minutes of one class will be reserved for students to evaluate their lecturers and their courses or modules through questionnaires.

Continuous assessment

Students must provide evidence of their progress by completing various tasks and tests. These activities are detailed in the table at the end of this section of the Study Guide.

Review

When publishing final marks prior to recording them on students' transcripts, the lecturer will provide written notification of a date and time for reviewing assessment activities. Students must arrange reviews in agreement with the lecturer.

Missed/failed assessment activities

Students may retake assessment activities they have failed or compensate for any they have missed, provided that those they have actually performed account for a minimum of 66.6% (two thirds) of the subject's final mark and that they have a weighted average mark of at least 3.5.

The lecturer will inform students of the procedure involved, in writing, when publishing final marks prior to recording them on transcripts. The lecturer may set one assignment per failed or missed assessment activity or a single assignment to cover a number of such activities. Under no circumstances may an assessment activity worth 100% of the final mark be retaken or compensated for. In case of retaking, maximum grade will be 5 (Pass).

Classification as "not assessable"

In the event of the assessment activities a student has performed accounting for just 25% or less of the subject's final mark, their work will be classified as "not assessable" on their transcript.

Misconduct in assessment activities

Students who engage in misconduct (plagiarism, copying, personation, etc.) in an assessment activity will receive a mark of "0" for the activity in question. In the case of misconduct in more than one assessment activity, the student involved will be given a final mark of "0" for the subject. Assessment activities in which irregularities have occurred (e.g. plagiarism, copying, impersonation) are excluded from recovery.

Single assessment

This subject is not suitable for single assessment.
