Activities and Methodology

Title	Hours	ECTS	Learning Outcomes
Type: Directed			
Reading, oral and written comprehension tasks, written production and class activities.	90	3.6	1, 3, 4, 5, 7, 11, 12, 13, 14, 15
Type: Supervised			
Oral and written comprehension exercises, text composition, correction of the exercises done and troubleshooting.	90	3.6	1, 3, 4, 5, 11, 12, 14, 15
Type: Autonomous			
Study and practice of the new words in each lesson, preparation of activities for oral, written and reading comprehension.	90	3.6	1, 3, 4, 5, 7, 11, 12, 13, 14, 15

The formative activities are divided into directed activities, supervised activities, and autonomous activities.

Directed activities: the teacher will explain the most important contents of each unit; students will practise reading out loud and do exercises in oral and written comprehension, as well as oral expression exercises. They will practise new grammar points and vocabulary, sight translation, revise material already covered, etc. Class activities, therefore, will be varied and of different types (oral and written, individual and in groups). In some cases, they will be assessed (students will be assessed on whether they regularly prepare the tasks set by the teacher, as well as their dedication to the subject and the pace of their work).

Supervised activities (both face-to-face and virtual): these will include practising oral comprehension and expression, as well as the completion of exercises.

Autonomous activities: will consist of practising calligraphy, studying the characters and vocabulary, preparing and revising texts and new grammar points, completing and self-checking exercises (via the teaching web) and writing tasks.

The student will need to devote approximately 50 hours' study to each teaching unit, including the supervised and autonomous activities (preparation, practice exercises and revision). This level of commitment is essential to ensure that students follow the subject satisfactorily and achieve the appropriate pace of work.

Annotation: Within the schedule set by the centre or degree programme, 15 minutes of one class will be reserved for students to evaluate their lecturers and their courses or modules through questionnaires.

Assessment

Continuous Assessment Activities

Title	Weighting	Hours	ECTS	Learning Outcomes
Exercises (Listening tasks and tasks of comprehension and expression written)	40%	20	0.8	1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15
Tests	60% (30% x 2)	10	0.4	1, 3, 5, 6, 7, 15

Continuous Assessment

Students must provide evidence of their progress by completing tasks and tests. Task deadlines will be indicated in the course schedule on the first day of class. All activity deadlines are indicated in the subject's schedule and must be strictly adhered to.

Related matters

The above information on assessment, assessment activities and their weighting is merely a guide. The subject's lecturer will provide full information when teaching begins.

Review

When publishing final marks prior to recording them on students' transcripts, the lecturer will provide written notification of a date and time for reviewing assessment activities. Students must arrange reviews by agreement with the lecturer.

Missed/failed assessment activities

Students may retake assessment activities they have failed or compensate for any they have missed, provided that those they have actually performed account for a minimum of 66.6% (two thirds) of the subject's final mark and that they have a weighted average mark of at least 3.5. Under no circumstances may an assessment activity worth 100% of the final mark be retaken or compensated for.

The lecturer will inform students of the procedure involved, in writing, when publishing final marks prior to recording them on transcripts. The lecturer may set one assignment per failed or missed assessment activity or a single assignment to cover a number of such activities.

Classification as "not assessable"

In the event of the assessment activities a student has performed accounting for just 25% or less of the subject's final mark, their work will be classified as "not assessable" on their transcript.

Misconduct in assessment activities

Students who engage in misconduct (plagiarism, copying, personation, etc.) in an assessment activity will receive a mark of "0" for the activity in question. In the case of misconduct in more than one assessment activity, the students involved will be given a final mark of "0" for the subject.

Students may not retake assessment activities in which they are found to have engaged in misconduct. Plagiarism is considered to mean presenting all or part of an author's work, whether published in print or in digital format, as one's own, i.e. without citing it. Copying is considered to mean reproducing all or a substantial part of another student's work. In cases of copying in which it is impossible to determine which of two students has copied the work of the other, both will be penalised.

Single assessment

This subject may be assessed under the single assessment system in accordance with the terms established in the academic regulations of the UAB and the assessment criteria of the Faculty of Translation and Interpreting.

Students must make an online request within the period established by the faculty and send a copy to the teacher responsible for the subject, for the record.

Single assessment will be carried out in person on one day during week 16 or 17 of the semester. The Academic Management Office will publish the exact date and time on the faculty website.

On the day of the single assessment, teaching staff will ask the student for identification, which should be presented as a valid identification document with a recent photograph (student card, DNI/NIE or passport).

Single assessment activities

The final grade for the subject will be calculated according to the following percentages:

Oral exam 20%

Written exam 30%

Exam about other skills 40%

Portfolio 10%

Grade revision and resit procedures for the subject are the same as those for continual assessment. See the section above in this study guide.
