Sequence of the course

First, we will develop the first section (lectures and seminars), and the second section will be after (lectures and seminars).

In one way or another, the content of this course are connected with the subject "Fundamentals of Socio-education" and are to take into account for those students who wish to specialize in the socio-community aspects.

The sessions of Section 2 of this subject are based on research and experimentation with materials by students, which requires an investigation based on image documentation and recycling of materials for art and cultural practices. In addition, the methodology adopted for its successful development requires that students bring to the classroom materials for the realization of art and cultural activities. Teachers will recommend the most suitable material for planned activities, which will have a sustainable cost and can be shared among students. We will search for mechanisms to ensure that the student can have it in case he/she do not have the necessary resources.

Our teaching approach and assessment procedures may be altered if public health authorities impose new restrictions on public gatherings for COVID-19.

Annotation: Within the schedule set by the centre or degree programme, 15 minutes of one class will be reserved for students to evaluate their lecturers and their courses or modules through questionnaires.

Single assessment

1. Knowledge test based on the theoretical and methodological foundations of CDD. Conceptual deepening and case studies (30%).
2. Analysis (block 1) (15%) and research (block 2) of a community art-based project using arts-based methodologies (30%).
3. Individual reflection on the learning process of the subject and the relationship between the figure of the social educator and the intervention with artistic languages (25%).

The revision of the final grade follows the same procedure as for the continuous assessment. The delivery of the course evaluation tasks and the written test will take place on Tuesday 10th of June 2025.

In both assessment modalities:

To be entitled to resit the subject the student must have completed two thirds of the evaluation activities of the subject, and must have obtained a minimum of 3.5/10. Group work is not recoverable because the methodology does not allow it.

Taking into account the teaching methodologies used in this subject, based on reflective and creative processes, class attendance is important. In this subject, the active participation of the student is valued as an important factor in the final assessment.

One of the criteria necessary to pass this subject consists of demonstrating, throughout the course, that the student has developed the personal and social skills essential to be a social educator: active participation in classes, responsibility and rigour in independent work, non-judgement, argumentation, appropriate use of electronic devices (mobile phone, computer, etc.), critical thinking and behaviour that favours a friendly and positive, democratic environment in which differences are respected. The teaching staff will observe, document the sessions and note down evidence in relation to these personal and social skills of the students; and they will be evaluated throughout the course.

It is also necessary for the student to show good general communicative skills, both orally and in writing, and a good command of the vehicular language(s) listed in the teaching guide. Assessment will also look at cooperative and teamwork skills and will be gender-sensitive.

Copying or plagiarism will be grounds for failing the course.

The return of the different evaluation activities will take place no later than 20 working days after delivery.

The class resit date for the two forms of assessment will be the 1st of July 2025.
