Prerequisites

This subject does not have any pre-requirements

Objectives and Contextualisation

The focus of this subject is to be a reflection of the primordial objectives of the Degree.

The students must apply their knowledge, both theoretical and normative, to the management

of the Private Security world, which is composed of security companies and private security personal, being able to distinguish the different types of services that can be provided to the users, either public or private, and the functions and thresholds of the personal attributions that depend on the different professional categories.

This will be the foundation from which the student will acquire the necessary knowledge so that quality propositions can be created from within the private security; taking into consideration the law and the normative frame, and the consumer requirements regarding private security.

-Comprehend the foundations for the provisioning of private security services.

-Acquire knowledge of private security legislation.

-Be able to identify the functions belonging to the State Security Forces and the activities and services that are being, in a complementary and subordinated way, assigned to the private security forces.

-Be competent in regards with the theoretical contents and the normative frame so that coordination between professionals and technicians of this field can be achieved.

-Achieve linked knowledge with the other subjects of the Degree.

Competences

- Act with ethical responsibility and respect for fundamental rights and duties, diversity and democratic values.

- Apply the legal regulations governing the sector of prevention and integral security.
- Be able to adapt to unexpected situations.
- Carry out analyses of preventative measures in the area of security.
- Generate innovative and competitive proposals in research and in professional activity developing curiosity and creativity.
- Identify, manage and resolve conflicts.
- Make changes to methods and processes in the area of knowledge in order to provide innovative responses to society's needs and demands.
- Plan and coordinate the resources of the three large subsystems that interact in questions of security: people, technology and infrastructures.
- Respond to problems applying knowledge to practice.
- Students must be capable of applying their knowledge to their work or vocation in a professional way and they should have building arguments and problem resolution skills within their area of study.
- Students must be capable of collecting and interpreting relevant data (usually within their area of study) in order to make statements that reflect social, scientific or ethical relevant issues.
- Students must be capable of communicating information, ideas, problems and solutions to both specialised and non-specialised audiences.
- Students must develop the necessary learning skills to undertake further training with a high degree of autonomy.
- Students must have and understand knowledge of an area of study built on the basis of general secondary education, and while it relies on some advanced textbooks it also includes some aspects coming from the forefront of its field of study.
- Use the capacity for analysis and synthesis to solve problems.
- Work in institutional and interprofessional networks.

Learning Outcomes

1. Analyse the situation and identify the points that are best.
2. Apply the rules of professional practice for private security and private research.
3. Be able to adapt to unexpected situations.
4. Critically analyse the principles, values and procedures that govern professional practice.
5. Diagnose the situation of integral security in companies and organisations.
6. Generate innovative and competitive proposals in research and in professional activity developing curiosity and creativity.
7. Identify, manage and resolve conflicts.
8. Plan and manage prevention and security in accordance with the prevailing legislation applicable in the sector.
9. Respond to problems applying knowledge to practice.
10. Students must be capable of applying their knowledge to their work or vocation in a professional way and they should have building arguments and problem resolution skills within their area of study.
11. Students must be capable of collecting and interpreting relevant data (usually within their area of study) in order to make statements that reflect social, scientific or ethical relevant issues.
12. Students must be capable of communicating information, ideas, problems and solutions to both specialised and non-specialised audiences.
13. Students must develop the necessary learning skills to undertake further training with a high degree of autonomy.
14. Students must have and understand knowledge of an area of study built on the basis of general secondary education, and while it relies on some advanced textbooks it also includes some aspects coming from the forefront of its field of study.
15. Undertake collaborative management of private security plans.
16. Use the capacity for analysis and synthesis to solve problems.
17. Work in institutional and interprofessional networks.

Content

1. Security: as the right of people and as an essential public service.
2. Legal Framework of Public Safety: Organic Law 2/86 of FCS and Organic Law 4/2015, on the protection of citizen security.
3. The Spanish police model: FCS and its competencies. FCSE (National Police and Civil Guard Corps). Autonomic and Local Policies.
4. Concept of private security. Private security activities and services. Coordination and collaboration with FCS.
5. Legal Framework for Private Security: Law 5/2014 and its regulatory development.
6. Private security activities: material scope of private security service providers (companies and security professionals). The so-called compatible activities.
7. Prior authorization and intervention of the State. Authorization procedure. The so-called Responsible Declaration. Competences of the State and of the Autonomous Communities.
8. Formal and material requirements, and personal, to authorize a security company. State companies and autonomous companies.
9. The National Registry of Private Security. Registration and cancellation of companies. The Autonomous Registries.
10. General and specific obligations of security companies. Prohibitions
11. The security personnel: qualification and categories. The Private Detective and the Administration: obtaining of the qualification, identity card and book-registry.

Registration in the Registry of the General Directorate of the Police or in the Autonomous Registry. Functions of the Private Detective. Statute (rights and duties) of the Private Detective. The Detention ceased.
12. General obligations of security personnel: Duty Assistance and collaboration with the FCS. The principles of action (Code deontological). Sanctioning Regime. Violations of regulations in the field of private security.
13. Private research. The Private Detective in modern society. The professional performance of the Private Detective in relation to the needs of modern societies. Private Self Detective, Agencies, Delegations and Branches. Requirements. Professional honors: applicable deontological criteria. The ethical requirement of a previous budget. Applicable legal regulation and its relation to the ethical norms.
14. The search for crimes by private detectives. Criminal investigation authorized by Private Detectives. The condition of "legitimized" for the exercise of criminal action (Art. 48.1 c) LSP.
15. Special consideration of the intervention of the DP in the civil process. Articles 265 1.5. and 380 LEC. The DP as a collaborator of the Justice Administration. Legal status of the DP. Special analysis of the differences between witness and expert. The figure of the witness-expert.
16. Responsibility of the DP: criminal and / or civil. Analysis of the disciplinary system: causes and jurisprudential doctrine. Common assumptions investigated by the DP: frauds in IT, unfair competition, non-attendance, abandonment of work day and low performance, damages to the company and its employees.
17. Specific functions of the different categories of security personnel: Special reference to the Chiefs and Directors of Security.
18. The Departments of Security: Creation and functions. Security measures and forced establishments. The so-called critical infrastructures. UNE-EN Standards and Quality Certificates in the field of private security.

Activities and Methodology

Title	Hours	ECTS	Learning Outcomes
Type: Directed			
Theoretical classes	10	0.4	1, 2, 4, 5, 8, 15
Type: Supervised			
Resolution of practical cases	24	0.96	3, 6, 7, 9, 16, 17
Type: Autonomous			
Personal study: personal work of consolidation of knowledge	116	4.64	1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17

Teaching language: Spanish.

As indicated in the contextualization of the subject, "Private Security Law" has a theoretical aspect and a practical aspect. The theoretical aspect is learned through the study of materials. The practical aspect of the subject is developed through exercises that will be done individually but where a Forum of doubts and debates will be created.

The course has a MOODLE page open in the Virtual Campus where you will find the subject materials, news and instructions for the subject and the system to do the delivery of work, among other applications.

To access, you must enter the UAB Virtual Campus, whose address is: <https://cv.uab.cat/>. You have to enter with the University Identification Number (NIU) and password (password) that is provided in the registration process.

The Virtual Campus is also the main communication tool of the students with the teacher, both at the level of doubts, and communication of possible problems in the development of the subject. When a student wants to get in touch with a teacher, they will use the Moodle classroom messaging in preference to the use of email. For each of the PECs a forum will be opened for questions and debates where participation is key to answering questions or expanding knowledge and sharing them. Tutorials with the faculty will be arranged by email.

It is important to mention that the main objective of the video classes is to resolve the doubts related to the syllabus, therefore, it is essential to prepare the topics before each session.

Annotation: Within the schedule set by the centre or degree programme, 15 minutes of one class will be reserved for students to evaluate their lecturers and their courses or modules through questionnaires.

Assessment

Continuous Assessment Activities

Title	Weighting	Hours	ECTS	Learning Outcomes
Delivery of exercises and work done by students	60%	0	0	1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17
Partial exam(s) and Final exam of continuous evaluation	40%	0	0	1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17

CONTINUOUS ASSESSMENT

There will be two individual PECs corresponding to the topics studied in the course. Each PEC has a weight of 30% of the final grade of the course. The remaining 40% corresponds to the theoretical exam.

The exam averages with the continuous evaluation regardless of the grade obtained.

The total weighted average must be 5 points or higher in order to pass.

SINGLE EVALUATION

Students who opt for the single evaluation will take a final synthesis test of all the content of the course (40%) and will hand in a document containing the solutions to the two PECs of the course (30% each).

The date for this test and the delivery of the work of the subject will be the same scheduled in the timetable for the last continuous evaluation exam.

The same recovery system will be applied as for the continuous evaluation.

EVALUATION OF THE STUDENTS IN SECOND OR MORE SUMMONS

Students who repeat the course will have to take the scheduled tests and exams and hand in the course work on the dates indicated in the Moodle classroom.

SECOND CHANCE EXAMINATION

The student who does not pass the course, who does not reach 5 (total) out of 10, according to the criteria established in the two previous sections may take a final exam provided that the student has been evaluated in a set of activities, the weight of which is equivalent to a minimum of two thirds of the total grade of the course. If the student has not been evaluated of these two thirds because he/she has not taken the tests, he/she will obtain a grade of Not Presented, without the possibility of taking the final exam.

In this exam the whole of the contents of the subject that have not been passed in the continuous evaluation will be re-evaluated.

In the case of passing the final exam, the course will be approved with a maximum of 5, regardless of the grade obtained in the exam.

CHANGE OF DATE OF A TEST OR EXAMINATION

Students who need to change an evaluation date must submit the request by filling out the document that can be found in the EPSI Tutoring Moodle space.

Once the document has been filled in, it must be sent to the professor of the subject and to the coordination of the Degree.

REVIEW

At the time of each evaluation activity, the faculty will inform the students of the grade review mechanisms.

For single evaluation students, the review process will be the same.

OTHER CONSIDERATIONS

Without prejudice to other disciplinary measures deemed appropriate, and in accordance with current academic regulations, "in the event that the student performs any irregularity that may lead to a significant variation in the grade of an act of evaluation, this act of evaluation will be graded with a 0, regardless of the disciplinary process that may be instigated. in the event that several irregularities occur in the acts of evaluation of the same subject, the final grade of this subject will be 0 ".

If during the correction there are indications that an activity or work has been done with answers assisted by artificial intelligence, the teacher may supplement the activity with a personal interview to corroborate the authorship of the text.

If there are unforeseen circumstances that prevent the normal development of the course, the teacher may modify both the methodology and the evaluation of the course.
