The theoretical classes will be done with ICT support and encouraging group participation and debate. Students will present in class in summary the points discussed in the previous session. The practical classes consist of case resolution and jurisprudence analysis with the active participation of the student exposing the problem and discussing the solutions. Reading of doctrine and jurisprudence as a basis to solve practical cases applying the theory taught. Tutorials with the faculty will be arranged by email.

Annotation: Within the schedule set by the centre or degree programme, 15 minutes of one class will be reserved for students to evaluate their lecturers and their courses or modules through questionnaires.

Assessment

Continous Assessment Activities

Title	Weighting	Hours	ECTS	Learning Outcomes
Delivery and evaluation of exercises and work done by students	50%	0	0	1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14

The course evaluation system is a CONTINUOUS ASSESSMENT system.

The subject consists of two clearly differentiated parts that will be evaluated separately.

In each part there will be a theoretical written test and several practical theoretical exercises to develop.

Theory tests

There will be a theoretical test at the end of each part of the subject, with a value of 2.5 points each, respecting the final grade for the subject. Being the total value of 5 points out of 10.

In order to add the marks of the practical exercises, it is necessary to have obtained a 4 out of 10 (1 out of 2.5) for each theoretical exercise.

Practical exercises

The student has to carry out a series of practical exercises for each part of the subject, with a value of 2.5 points, respecting the final grade. Being the total value of 5 points out of 10.

In order to average the grades obtained in both parts of the subject, it is necessary to have obtained at least 4 out of 10 (2 out of 5) for each part of the subject.

Not assessable

The student who, at the end of the term of continuous evaluation, does not make 50% of the supplies of this, will be counted as not assessable.

Single Assessment

Students who opt for the single assessment will take two written theory tests* with a value of 2.5 points out of 10 each and two practical exercises with a value of 2.5 points out of 10 each. There will be a theoretical test at the end of each part of the subject, with a value of 2.5 points, each, with respect to the final grade for the subject.

In order to add the mark of the practical exercises it is necessary to have obtained a 4 out of 10 (1 out of 2.5) in each theoretical exercise.

Evaluation of students in the second call or more

The students who repeat the subject will have to take the tests and exams scheduled on the dates indicated in the Moodle classroom, recommending attendance to the classes.

Recovery exam

The student who does not pass the subject, who does not reach 5 (total) out of 10, in accordance with the criteria established in the two previous sections, may take a final exam provided that the student has been evaluated in a set of activities, the weight of which is equivalent to a minimum of two thirds of the total grade for the subject. If she has not been evaluated by these two third parties because she has not taken the tests, she will obtain a score of Not Present, without having the possibility of taking the final recovery exam.

In this exam, all the contents of the subject that have not been passed in the continuous assessment will be evaluated again.

In the case of passing the final exam, the course will be approved with a maximum of 5, regardless of the grade obtained in the exam.

Changing the date of a test or exam

Students who need to change an assessment date must submit the request by filling in the document found in the Moodle space for EPSI Tutoring.

Once the document has been completed, it must be sent to the teaching staff of the subject and to the coordination of the Degree.

Revision

At the time of carrying out each evaluation activity, the teaching staff will inform the students of the mechanisms for reviewing the grades.

For single assessment students, the review process will be the same.

Other considerations

Without prejudice to other disciplinary measures deemed appropriate, and in accordance with current academic regulations, "in the event that the student performs any irregularity that may lead to a significant variation in the grade of an evaluation act, he will be graded with a 0 this act of evaluation, regardless of the disciplinary process that can be initiated. In the event that several irregularities occur in the acts of evaluation of the same subject, the final grade for this subject will be 0".

If there are unforeseen circumstances that prevent the normal development of the subject, the teaching staff may modify both the methodology and the evaluation of the subject.
