Activities and Methodology

Title	Hours	ECTS	Learning Outcomes
Type: Directed			
Classes with ICT support and collective discussion	47	1.88	
Type: Supervised			
Exercices	12	0.48	
Type: Autonomous			
Study and Readings	85	3.4	

The teaching methodology will be based mainly on:

- Lectures with ICT support and collective discussion.

- Reading and commenting on fragments of literary texts and texts of literary criticism.
- Viewing and commenting on audiovisual documents.
- Oral presentation, by the students, of proposed topics and activities, which may give rise to questions and debate. These presentations will be carried out according to the flipped classroom model, preferably in small groups and will include the participation of all the students present in the classroom (who, previously, will have worked with materials related to each topic presented). Linguistic engineering techniques applied to the analysis of literary text can be included.

Note: 15 minutes of a class will be reserved, within the timetable established by the centre/title, for the complementation by the students of the assessment surveys of the teaching staff's performance and the assessment of the subject.

Annotation: Within the schedule set by the centre or degree programme, 15 minutes of one class will be reserved for students to evaluate their lecturers and their courses or modules through questionnaires.

Assessment

Continuous Assessment Activities

Title	Weighting	Hours	ECTS	Learning Outcomes
Active participation in classes	20%	0	0	1, 10, 2, 12, 5, 6, 4, 9
First formative exam	20%	1.5	0.06	10, 2, 3, 5, 6, 4, 7, 9
Oral presentations in class	40%	3	0.12	1, 8, 10, 2, 3, 11, 12, 5, 6, 4, 7, 9
Second formative exam	20%	1.5	0.06	1, 10, 2, 3, 5, 6, 4, 7, 9

The evaluation of the course will be continuous (except in cases where a single assessment has previously been requested according to current regulations) and will include tests, comments and presentations delivered throughout the semester, and active participation during classes. It will include two exams, one of them partial and one of synthesis (preferably an oral test).

The single assessment will consist of a single test (oral) and will require the delivery of a presentation (which will also be given orally within the framework of the aforementioned test) and a written work that develops the subject of the presentation. The same assessment method as continuous assessment will be used.

To participate in the reexamination process (that will consist in a global remedial exam), the students must have been previously evaluated in a set of activities whose weight equals a minimum of 2/3 of the total grade. Only students who, having failed, have at least a final average grade of 3.5 out of 10 will have the right to reexamination. Oral presentations and tasks related to daily teaching activities are non-recoverable. Students who have completed less than 2/3 of the evaluation activities will be considered 'NOT EVALUABLE'.

At the time of the completion of each evaluation activity, students will be informed of the procedure and date of review of the evaluation. Plagiarism: The total or partial plagiarism of any exercise, examination or paper will automatically be considered FAILURE (0). PLAGIARISM is to copy from unidentified sources, either a single phrase or more, presenting it as your own production. It constitutes a serious offense.

In the event of a student committing any irregularity that may lead to a significant variation in the grade awarded to an assessment activity, the student will be given a zero for this activity, regardless of any disciplinary process that may take place. In the event of several irregularities in assessment activities of the same subject, the student will be given a zero as the final grade for this subject.

In the event that tests or exams cannot be taken onsite, they will be adapted to an online format made available through the UAB's virtual tools (original weighting will be maintained). Homework, activities and class participation will be carried out through forums, wikis and/or discussion on Teams, etc. Lecturers will ensure that students are able to access these virtual tools, or will offer them feasible alternatives.

Bibliography

This is a very succinct bibliography that will have to be consulted by the whole class group. During the course, specific bibliography will be provided according to the aspects of the work that different students or groups of students wish to analyze.
