Prerequisites

Students must have previous general knowledge on public administration and economics at Degree level

Objectives and Contextualisation

The student at the end of the module:

- You will be able to handle the basic instruments of planning, preparation, execution and budgetary control
- You will be able to understand and apply the new budget management techniques.
- You will be able to understand and perform the operations of public accounting and analyze the accounting and financial indicators.
- You will be able to evaluate the economic and financial situation of a public administration based on the accounting and budgetary information.

- You will be able to understand and perform the procurement and purchasing operations of public administrations.
- You will know how to define and apply the basic indicators of public management
- Will be able to understand and apply public marketing and the main instruments and indicators of quality management
- You will understand the budgetary control mechanisms

Competences

- Address complex public intervention situations, possibly involving ethical dilemmas, on the basis of proposals founded both on explicit values and on conceptual and methodological rigour.
- Apply concepts, theories and models from various disciplines in the exercise of public administration duties.
- Continue the learning process, to a large extent autonomously
- Design and evaluate processes of public intervention in specific social, political and sectorial situations and problem areas.
- Identify, understand and analyse complex social and political phenomena that are important to the exercise of public administration duties.
- Propose innovative solutions to solve social and political problems.
- Use acquired knowledge as a basis for originality in the application of ideas, often in a research context.

Learning Outcomes

1. Address complex public intervention situations, possibly involving ethical dilemmas, on the basis of proposals founded both on explicit values and on conceptual and methodological rigour.
2. Analyse efficiency in the provision of public services.
3. Analyse high-quality strategies and instruments in a public organisation.
4. Analyse the economic and financial situation of a public administration.
5. Carry out accounting operations.
6. Continue the learning process, to a large extent autonomously.
7. Prepare and execute a public administration budget.
8. Prepare technical proposals on quality management.
9. Propose innovative solutions to solve social and political problems.
10. Use acquired knowledge as a basis for originality in the application of ideas, often in a research context.
11. Use the new budgeting techniques

Content

Structure and contents of the module

Blocks	ECTS	Teachers
Budgetary management	1,5	<i>Antoni Mora (UB)</i>
New budget techniques	1,5	<i>Antoni Mora(UB)</i>

Public Accounting	2	<i>Daniel Mas (UB)</i>
Public procurement	1	<i>Cristina Pruñonosa (UB)</i>
Marketing of public services and management of the quality of services	2	<i>Cristina Pruñonosa (UB)</i>
Mechanisms of budgetary control	2	<i>Núria Bosch (UB)</i>

Program

Block 1: Budgetary management

- Concept, structure and principles of the budget
- The budget cycle
- The preparation of the budget
- Implementation and settlement of the budget

Tutored activities:

In this block, the theoretical explanations will be combined with the accomplishment of exercises in class and commentaries of information published in the press or by Internet. In relation to the evaluation of the block, the students will have to solve two exercises in the same line of those already done in class.

Block 2: New budget techniques

- The New Public Management
- The result-oriented budget
- Other budgetary methodologies:

Medium-and long-term budget planning

Expenditure review

Evaluation of public policies

Budget transparency

Public management indicators

Block 3: Public Accounting

The public accounting system: public sector and public administrations

- Public accounting and national accounting
- The subjects of the public accounting administrations and territorial entities. Criteria of the SEC.
- Normalization of public accounting: accounting plans.
- Accounting statements of public accounting.

The accounting of the management of the budget: operations and results.

- Operations of the budgetary management: criteria for the accounting recognition
- Accounting of the revenue budget: budgetary management and recognition of rights

- Accounting of the expenditure budget: budgetary management and recognition of obligations
- Accounting of debtors and creditors

The accounting of the patrimonial position: operations and results

- The assets: assets, liabilities and net asset position. Criteria for interpretation.
- The accounting of the fixed assets. Type of fixed assets and most common operations.
- The accounting of the operations of the long and short-term debt.

The financial diagnosis of Public Entities based on accounting information.

- The states and the annual accounts: content and criteria for the preparation and interpretation.
- The financial analysis of Public Entities: the case of Local Entities.
- The "groups" of Entities and the consolidated financial information.

Tutored activities:

The financial and economic information published by the Councils of Catalonia by the Sindicatura de Comptes de Catalunya (www.sindicatura.org), will be analyzed and we will carry out a financial diagnosis based on the information.

Block 4: Public procurement

Normative Framework

- The Law of Contracts of the Public Sector.
- The evolution of the contractual regulations from the LCAP of 1995.
- Balance and perspectives.

General aspects of recruitment

- General requirements for the conclusion of contracts.
- Object and price of the contracts.
- Capacity of individuals to hire.

The contract cycle

- The preparation of contracts.
- The recruitment files.
- The bidding and the award of contracts.
- Procedures and forms of adjudication.
- Perfection, execution and termination of contracts.

The contracts of consultancy and assistance, services and supplies.

- The state and community models in the organization of the supply of goods, products and services by the public sector.
- General provisions. Special regime of guarantees: the withholding of part of the price. Modification and specific causes of resolution. Peculiarities of the project development contract.
- The supply contract. General rules Advertising Weighting of award criteria.
- Own and complementary aspects in the Purchase Management and Public procurement of public supplies.

The works contract

- The project phase.
- Procedures, forms of adjudication and publicity in the works contracts.
- Checking the replanning.
- The modification of the contract and the suspension of the works.
- The contract for the concession of public works
- The financing and private management of infrastructures of public interest.

Tutored activities:

In the tutorials, a number of practical cases related to the different modalities of public contracts will be analyzed and discussed: technical assistance, works, etc. In order to promote the transversal competences of the module, a practical case will be presented in which the students will be asked that simulate being the members of a recruitment table. For groups, it will be about analyzing the different offers presented and choosing the most appropriate ones, in order to publicly present the arguments and defend them.

Block 5: Public marketing and quality management of services

Marketing of services and their application to the public sector

- The concept of marketing and evolution of visions
- Differences in services regarding products
- The market for public services and the public exchange model: segmentation, positioning, marketing mix.
- The role of citizen-client, investment of the pyramid
- Production of a public service: design, "manufacture" and communication.

The quality of services in the public sector

- Quality in public services: concept, evolution and current situation
- Improvement in the provision of service and customer service: service letters, complaints and suggestions, ISO, ...
- Evaluation of the quality from the point of view of the user-client
- Quality indicators: collection of information, treatment and analysis of results

Tutored activities:

In the tutorials, two practical cases will be analyzed and discussed: students will be asked to define the marketing strategy of a public organization that has designed a new service and wants to be put into operation. In the other case, it will try to see the implications derived from the introduction of the ISO in a public organism. Likewise, it is planned to carry out a visit to the Office of Business Management, which is certified by ISO for more than 10 years, with the objective of analyzing in-situ the implications of the use of the ISO in the improvement of the provision of the service and the attention to the citizen.

Block 6: Mechanisms of budgetary control

Different control mechanisms

- The control mechanisms and the budgetary cycle
- Internal control and external control
- Control and performance of accounts

Budget control techniques

- Control of legality and regularity and control of results
- Evaluation techniques
- Comparative experiences

Tutored activities:

The tutored activities will be basically of two types. On the one hand, practical sessions, in which students will have to solve a practical subject, or comment on and discuss a specific control report. On the other hand, sessions with a guest, expert in one of the control subjects treated.

Activities and Methodology

Title	Hours	ECTS	Learning Outcomes
Type: Directed			
Seminars and tutorials	50	2	1, 6, 9, 10
Type: Supervised			
Exams and exercises	75	3	1, 6, 9, 10
Type: Autonomous			
Lectures	125	5	1, 6, 9, 10

Teaching methodology

The work method will be based on the following activities:

- Classroom-based theoretical sessions.
- Directed personal work. The learning of the students is based, fundamentally, on the personal work that it does based on the indications of the responsible teaching staff and the indicated materials.
- Face-to-face sessions for monitoring and exposure of directed activities.
- Autonomous learning activities.

Annotation: Within the schedule set by the centre or degree programme, 15 minutes of one class will be reserved for students to evaluate their lecturers and their courses or modules through questionnaires.

Assessment

Continuous Assessment Activities

Title	Weighting	Hours	ECTS	Learning Outcomes
Attendance class	10%	0	0	1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11
Essays	40%	0	0	1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11

Evaluation

The final evaluation of the student will be based on the following three elements:

- Attendance is mandatory. It will count 10% of the final mark.
- The realization of different learning activities in each block. A note will be obtained from each of the 6 blocks that configure the module by performing exercises and jobs. The average of these 6 notes will be made and will count 40% of the final grade.
- The completion of a single individual exam at the end of the course with questions from all the blogs. It will count 50% of the final mark.
