The PUE is a training program in alternation that corresponds to two cou
The participating company in the PUE hosts previously selected students
Two are the fundamental objectives of the PUE:
- Facilitate the professionalization of the student through their practical tra
- To bring the University closer to the company in order to efficiently cove

Competences

Business Administration and Management
- Capacity for oral and written communication in Catalan, Spanish and English, which enables synthesis and oral and written presentation of the work carried out.
- Demonstrate a capacity for integration within a work environment and apply the skills and competencies acquired during the degree course.
- Demonstrate initiative and work individually when the situation requires it.
- Organise the work in terms of good time management, organisation and planning.
- Select and generate the information necessary for each problem, analyse it and take decisions based on that information.
- Work well in a team, being able to argue proposals and validate or reject the arguments of others in a reasoned manner.

Learning Outcomes

1. A capacity of oral and written communication in Catalan, Spanish and English, which allows them to summarise and present the work conducted both orally and in writing.
2. Demonstrate initiative and work independently when required.
3. Demonstrate the ability to integrate into a work setting, and to apply the skills and competencies acquired in the degree.
4. Organise work, in terms of good time management and organisation and planning.
5. Select and generate the information needed for each problem, analyse it and make decisions based on this information.
6. Work as part of a team and be able to argue own proposals and validate or refuse the arguments of others in a reasonable manner.

This asset is not matched by other subjects and / or work experience

This subject doesn't provide for the single assessment system.

Use of Artificial Intelligence (AI) Technologies

For this course, the restricted use of Artificial Intelligence (AI) technologies is permitted exclusively for support tasks, such as bibliographic or information searches, text correction, or translations. Students must clearly identify which parts have been generated using this technology, specify the tools used, and include a critical reflection on how these tools have influenced the process and the final outcome of the activity. Lack of transparency in the use of AI in an assessable activity will be considered a breach of academic integrity and may result in partial or total penalization of the grade for the activity, or more severe sanctions in serious cases.

Bibliography

Software

Good knowledge of Microsoft Office, specially Excel, and some skills of a statistical package to analyse data.
