## Teaching groups languages

You can view this information at the end of this document.

## Prerequisites

This subject doesn't have any pre-requierments

## Objectives and Contextualisation

Training objectives

Identify and properly assess the risks.

Know the different preventive disciplines.

Know the main preventive activities. to eliminate or control the risks.

Know the differences between an emergency plan and a self-protection plan and be able to elaborate the basic slogans for a center or activity.

Known for each subject the basic regulations of reference.

## Competences

- Act with ethical responsibility and respect for fundamental rights and duties, diversity and democratic values.
- Be able to adapt to unexpected situations.
- Carry out analyses of preventative measures in the area of security.
- Communicate information , ideas, problems and solutions to both specialised and non-specialised publics.
- Generate innovative and competitive proposals in research and in professional activity developing curiosity and creativity.
- Have a general understanding of basic knowledge in the area of prevention and integral safety and security.
- Plan and coordinate the resources of the three large subsystems that interact in questions of security: people, technology and infrastructures.

1

- Respond to problems applying knowledge to practice.
- Students must be capable of applying their knowledge to their work or vocation in a professional way and they should have building arguments and problem resolution skills within their area of study.
- Students must be capable of collecting and interpreting relevant data (usually within their area of study) in order to make statements that reflect social, scientific or ethical relevant issues.
- Students must be capable of communicating information, ideas, problems and solutions to both specialised and non-specialised audiences.
- Students must develop the necessary learning skills to undertake further training with a high degree of autonomy.
- Students must have and understand knowledge of an area of study built on the basis of general secondary education, and while it relies on some advanced textbooks it also includes some aspects coming from the forefront of its field of study.
- Take sex- or gender-based inequalities into consideration when operating within one's own area of knowledge.
- Use the capacity for analysis and synthesis to solve problems.
- Work in institutional and interprofessional networks.

## Learning Outcomes

1. Apply systems of responsibility and management models particular to models of labour risk prevention management.
2. Be able to adapt to unexpected situations.
3. Coordinate the resources of the three main subsystems of the prevention and integral security sector: people, technology and infrastructures.
4. Critically analyse the principles, values and procedures that govern professional practice.
5. Generate innovative and competitive proposals in research and in professional activity developing curiosity and creativity.
6. Identify the most common labour risk factors.
7. Implement and evaluate a plan for labour risk prevention in an organisation.
8. Propose projects and actions that incorporate the gender perspective.
9. Respond to problems applying knowledge to practice.
10. Students must be capable of applying their knowledge to their work or vocation in a professional way and they should have building arguments and problem resolution skills within their area of study.
11. Students must be capable of collecting and interpreting relevant data (usually within their area of study) in order to make statements that reflect social, scientific or ethical relevant issues.
12. Students must be capable of communicating information, ideas, problems and solutions to both specialised and non-specialised audiences.
13. Students must develop the necessary learning skills to undertake further training with a high degree of autonomy.
14. Students must have and understand knowledge of an area of study built on the basis of general secondary education, and while it relies on some advanced textbooks it also includes some aspects coming from the forefront of its field of study.
15. Use the capacity for analysis and synthesis to solve problems.
16. Work in institutional and interprofessional networks.

## Content

Introduction. Working conditions and Health.

Types of risks.

Accidents / Incidents.

Accident / Incident Investigation.

Risk analysis. Risk assessment.

Monitoring corrective measures.

Risk analysis, assessment and control. Workspaces

Risk analysis, assessment and control. Technical Building Code

Emergency and self-protection plans

Risk analysis, assessment and control. Product safety (machines and work equipment).

Receipts and devices.

Personal protective equipment.

Signage

Risk analysis, assessment and control. Other work teams

Mobile equipment and load lifting equipment.

Facilities.

Scaffolding and Manual Ladders

Storage

Fires-Explosions

## Activities and Methodology

| Title | Hours | ECTS | Learning Outcomes |
|---|---|---|---|
| Type: Directed | | | |
| Directed | 16 | 0.64 | |
| Type: Supervised | | | |
| Supervised | 24 | 0.96 | |
| Type: Autonomous | | | |
| Autonomus | 110 | 4.4 | |

Teaching language: Spanish

The training is based mainly on the reading of the course manual.

This will be the basic document to be able to overcome it.

However, a series of reference documents is to be presented as a complementary reading during the course.

It iIt is important to mention that the main objective of the video classes is to resolve the doubts related to the syllabus, therefore it is essential to prepare the topics before each session.

Annotation: Within the schedule set by the centre or degree programme, 15 minutes of one class will be reserved for students to evaluate their lecturers and their courses or modules through questionnaires.

## Assessment

## Continous Assessment Activities

| Title | Weighting | Hours | ECTS | Learning Outcomes |
|---|---|---|---|---|
| Continuous Assessment Final Test | 50% | 0 | 0 | 2, 4, 1, 3, 9, 5, 6, 7, 8, 14, 13, 12, 10, 11, 16, 15 |
| Continuous evaluation excercices | 50% | 0 | 0 | 2, 4, 1, 3, 9, 5, 6, 7, 8, 14, 13, 12, 10, 11, 16, 15 |

CONTINUOUS ASSESSMENT

There will be four individual PECs corresponding to the topics studied in the course. Each PEC has a weight of 12.5% of the final grade of the course. The remaining 50% corresponds to the theoretical exam.

The exam is averaged with continuous evaluation regardless of the grade obtained from 3.

The total weighted average must be 5 points or higher in order to pass.

SINGLE EVALUATION

Students who opt for the single assessment will take a final synthesis test of all the content of the subject with a theoretical part and a practical part.

The date for this test and the delivery of the work of the subject will be the same scheduled in the timetable for the last continuous evaluation exam.

The same recovery system will be applied as for the continuous evaluation.

EVALUATION OF THE STUDENTS IN SECOND OR MORE SUMMONS

Students who repeat the course will have to take the scheduled tests and exams and hand in the course work on the dates indicated in the Moodle classroom.

SECOND CHANCE EXAMINATION

The student who does not pass the course, who does not reach 5 (total) out of 10, according to the criteria established in the two previous sections may take a final exam.

In this exam the whole of the contents of the subject that have not been passed in the continuous evaluation will be re-evaluated.

In the case of passing the final exam, the course will be approved with a maximum of 5, regardless of the grade obtained in the exam.

NOT ASSESSABLE

The student who has not completed at least two thirds of the subject's qu

CHANGE OF DATE OF A TEST OR EXAMINATION

Students who need to change an evaluation date must submit the request by filling out the document that can be found in the EPSI Tutoring Moodle space.

Once the document has been filled in, it must be sent to the professor of the subject and to the coordination of the Degree.

REVIEW

At the time of each evaluation activity, the faculty will inform the students of the grade review mechanisms.

For single evaluation students, the review process will be the same.

OTHER CONSIDERATIONS

Without prejudice to other disciplinary measures deemed appropriate, and in accordance with current academic regulations, "in the event that the student performs any irregularity that may lead to a significant variation in the grade of an act of evaluation, this act of evaluation will be graded with a 0, regardless of the disciplinary process that may be instigated. in the event that several irregularities occur in the acts of evaluation of the same subject, the final grade of this subject will be 0 ".

If during the correction there are indications that an activity or work has been done with answers assisted by artificial intelligence, the teacher may supplement the activity with a personal interview to corroborate the authorship of the text.

If there are unforeseen circumstances that prevent the normal development of the course, the teacher may modify both the methodology and the evaluation of the course.

Use of IA

In this subject, the use of Artificial Intelligence (AI) technologies is allowed as an integral part of the development of the work, provided that the result reflects a significant contribution of the student in the analysis and personal reflection. The student must clearly identify which parts have been generated with this technology, specify the tools used and include a critical reflection on how these have influenced the process and the result of the activity. The lack of transparency in the use of AI will be considered a lack of academic honesty and may lead to a penalty in the grade of the activity, greater sanctions in cases of seriousness.
