Group languages

You can consult this information at the [end](#) of the document.

Prerequisites

In this subject the patterns of behaviour and language associated with other disorders will be dealt with, therefore, in order to take this subject, it is highly recommended that students have previously studied the milestones of typical development (including language) as well as the specific language disorders.

Also a good command of reading skills in English is desirable.

Objectives

The subject aims to offer students knowledge of the behaviour and language features associated with the following disorders: syndromic intellectual disability, autism spectrum disorders, cerebral palsy, attention deficit disorders with or without hyperactivity.

When the subject is completed, the student will be able to:

- Be sensitive to understanding the overall involvement of persons who present these disorders.
- Identify the language characteristics associated with the disorders studied.
- Meet the speech therapy needs of persons who present these disorders.

Learning outcomes

- CM14 (Generate examination and diagnosis reports, as well as the appropriate treatment guidelines for each user according to their pathology.) Generate examination and diagnosis reports, as well as the appropriate treatment guidelines for each user according to their pathology.
- KM28 (Explain the usefulness and indications of the language assessment tools that best suit the characteristics of each pathology or any other personal condition.) Explain the usefulness and indications of the language assessment tools that best suit the characteristics of each pathology or any other personal condition.
- KM29 (Identify typical and atypical language patterns in patients with different pathologies or disabilities.) Identify typical and atypical language patterns in patients with different pathologies or disabilities.

- KM30 (Explain language disturbances secondary to disorders in other spheres.) Explain language disturbances secondary to disorders in other spheres.
- SM27 (Issue a probable diagnosis, as well as possible differential diagnoses, from cases presented on video or from the reading of reports.) Issue a probable diagnosis, as well as possible differential diagnoses, from cases presented on video or from the reading of reports.

Contents

This subject is structured into the following blocks:

BLOCK 1 - General introduction: Language disturbances related to other disorders

BLOCK 2. - Intellectual disability (ID)

ID concept: Definition and evolution.

Cognitive profile and adaptive behaviour in intellectual disability.

Language characteristics in non-syndromic intellectual disability.

-Language in syndromic ID

The following syndromes will be studied: Down syndrome, Fragile X syndrome, Prader Willi syndrome, Angelman syndrome, Rett syndrome, Williams syndrome, dup7q11.23 duplication syndrome, 22q11 deletion syndrome & 22q11 duplication syndrome.

For each syndrome the content is: aetiology and prevalence, physical and behavioural phenotype and speech and language profile.

BLOCK 3. - Autism Spectrum Disorders (ASD)

Aetiology and prevalence, physical and behavioural phenotype and speech and language profile.

BLOCK 4. - Language in Attention Adeficit Disorders (ADHD)

Concept and subtypes, aetiology and prevalence, cognitive and behavioural profile and speech and language characteristics.

BLOCK 5. - Language in Cerebral Palsy

Aetiology and prevalence, cognitive and behavioural phenotype and speech and language characteristics.

BLOCK 6 - Language in Mental Disorders

Learning activities and methodology

Title	Hours	ECTS	Learning outcomes
Practical classes	24	0.96	CM14, KM28, SM27
Theory	21	0.84	KM28, KM29, KM30
Supervised activity	2	0.08	
Study and practical case analyses	96	3.84	CM14, SM27

GUIDED ACTIVITY

Theoretical classes and seminars Lectures supported by ICT Case analysis seminars: students will discuss the exploration techniques used and formulate a diagnosis with supporting arguments.

SUPERVISED ACTIVITY

Tutorials: Follow-up tutorials for the completion of assigned work

INDEPENDENT ACTIVITY

- Reading articles, writing papers, studying, etc.
- In-depth reading of various documents (reports, evaluation protocols, etc.) and articles
- Case analysis
- Study: Creating outlines, concept maps, and summaries

Annotation: within the schedule set by the centre or degree programme, 15 minutes of one class will be reserved for students to evaluate their lecturers and their courses or modules through questionnaires.

Assessment

Continuous assessment activities

Title	Weight	Hours	ECTS	Learning outcomes
EV2 2nd exam	35	2	0.08	KM28, KM29, KM30
EV3 Practical case	30	4	0.16	CM14, SM27

EV1 Midterm exam	35	1	0.04	KM28, KM29, KM30
------------------	----	---	------	------------------

Continuous assessment:

EV1: 1st Midterm Exam. 35% of the total grade (first assessment period) Individual and on-site (1 h 30m)

EV2: 2nd Midterm Exam. 35% of the total grade (second assessment period) Individual and on-site (1 h 30m)

EV3: Practical cases. 30% of the total grade. Individual and on-line

The definition of passing a course through continuous assessment must necessarily include obtaining a weighted average of all assessment components equal to or greater than 5.0, as well as achieving a minimum score of 4.0 points (on a 10-point scale) in each of the on-site assessment tests (EV1 and EV2) that contribute 20% or more to the continuous assessment grade.

If these requirements are not met, the maximum grade that may be recorded in the academic transcript will be 4.5 points.

Resit examinations (during the resit period): Students who have not met the criteria established for passing the course may take one or more resit examinations. The course will be considered passed when the student obtains a grade of 5.0 or higher in the resit examination.

Students who have already passed the course may not take the resit examinations for the purpose of improving their grade.

Single assessment:

The single evaluation is requested electronically (e-formulari) in the specific period (more information on the Faculty website)

Name and description

	Duration	Date	
EV1:1r Midterm	35%	5 h	Second assessment period
EV2: 2n Midterm	35%		
EV3: Practical cases	30%		

Feedback:

Type of feedback	Assesment type	Week
Written	EV3 (Rubric)	16
Digital tool	EV2 (virtual campus)	19
In-class	EV1 (in-class correction)	11
Tutorial	EV1, EV3, EV2 (by appointment)	16,20,11

Exams Translation:

The translation of the evaluation exams will be carried out if the requirements established in article 263 are met. Request has to be electronically in week 4 electronically (e-formulari) (more information on the Faculty website)

Use of AI:

Prohibited use: the use of Artificial Intelligence (AI) technologies is not allowed at any stage of this course. Any assignment containing AI-generated content will be considered a breach of academic integrity and may result in partial or total penalties on the activity grade, or more serious sanctions depending on the severity of the case.
