

Degree programme	Type	Course
Prevention and Integral Safety and Security	OB	3

Contact lecturer

Name : César Torrero Fernandez

Email : cesar.torrero@uab.cat

Prerequisites

This subject does not have any pre-requirements

Group languages

You can consult this information at the [end](#) of the document.

Objectives

The objective of the subject is to provide the student with the basic knowledge of the figure of the private Detective and the functioning of the judicial police. (Regulation, competencies, administrative organization, areas of action and performance of its functions)

Learning outcomes

1. Identify the resources necessary for managing security, the environment, quality and social corporate responsibility.
2. Use the capacity for analysis and synthesis to solve problems.
3. Generate innovative and competitive proposals in research and in professional activity developing curiosity and creativity.
4. Respond to problems applying knowledge to practice.
5. Be able to adapt to unexpected situations.
6. Work in institutional and interprofessional networks.
7. Identify, manage and resolve conflicts.
8. Students must have and understand knowledge of an area of study built on the basis of general secondary education, and while it relies on some advanced textbooks it also includes some aspects coming from the forefront of its field of study.
9. Students must be capable of applying their knowledge to their work or vocation in a professional way and they should have building arguments and problem resolution skills within their area of study.
10. Students must be capable of collecting and interpreting relevant data (usually within their area of study) in order to make statements that reflect social, scientific or ethical relevant issues.
11. Students must be capable of communicating information, ideas, problems and solutions to both specialised and non-specialised audiences.
12. Students must develop the necessary learning skills to undertake further training with a high degree of autonomy.
13. Propose new methods or well-founded alternative solutions.
14. Critically analyse the principles, values and procedures that govern professional practice.
15. Analyse the sex- or gender-based inequalities and the gender biases present in one's own area of knowledge.
16. Draw up management proposals for prevention and security in an organisation.

17. Analyse the preventative interventions in matters of security, environment, quality and social corporate responsibility and identify the inherent risk factors.
18. Know how to communicate and transmit ideas and result efficiently in a professional and non-expert environment, both orally and in writing.
19. Make efficient use of ITC in the communication and transmission of results.
20. Evaluate how gender stereotypes and roles affect professional practice.
21. Identify the infrastructure, technology and resources necessary to respond to operations in prevention and integral security.
22. Show respect for diversity and the plurality of ideas, people and situations.
23. Weigh up the risks and benefits of both your own proposals for improvement and those of others.
24. Analyse the situation and identify the points that are best.

Contents

Research techniques oriented to Private Investigation

- 1.-Legal framework - Limits - Penal system.
- 2.-Concept - Methodology and sources of information.
- 3.-Typology of economic-mercantile, labor, family investigations, L.A.O.
- 4.-Services investigation in events and public establishments.
- 5.-Investigation of crimes at the request of an interested part.

Research techniques oriented to the interview

- 1.-Introduction
- 2.-The interview
- 3.-Collection of data of interest
- 4.-The lie

Public Police Investigation

.-Public Police Investigation professionals will take part in this part.

Learning activities and methodology

Title	Hours	ECTS	Learning outcomes
Personal study, reading of articles and elaboration of academic works of the subject	94	3.76	1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24
Evaluation	4	0.16	
Tutorials to support the realization of practical and theoretical work	12	0.48	9, 11, 19
Theoretical and practice classes with the active participation of students	40	1.6	1, 2, 5, 6, 7, 12, 13

The subject is divided into three blocks. The first block will explain the principles of private research, in the second block three experts in public research explain the main functions of the forces and security bodies in the field of public research and, at the same time we have the third block where we will deal in depth the interview as a research technique both public, private and in the field of occupational risk prevention.

In each of the blocks the teachers will expose the theoretical part and promote the debate on the proposed topics.

At the same time the students will have to elaborate the work of the subject. The information on the work will be made available to the students through Moodle.

Tutoring with teachers will be specify by email.

Annotation: within the schedule set by the centre or degree programme, 15 minutes of one class will be reserved for students to evaluate their lecturers and their courses or modules through questionnaires.

Assessment

Continuous assessment activities

Title	Weight	Hours	ECTS	Learning outcomes
Partial exam(s) and Final exam of continuous evaluation	80%	0	0	2, 11, 12, 16, 18
Preparation and delivery of academic papers on the topics covered in the subject	20%	0	0	1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24

Continuous evaluation

The assessment system will consist of the preparation and submission of a project on private and/or public research (20%) and two final continuous assessment tests (80%):

A content test on private research (30%) and a content test on public research and interview techniques (50%).

All continuous assessment activities are mandatory for the course evaluation.

The work of the subject must have a grade of 4 to be able to add to the continuous evaluation. The final continuous assessment test must have a minimum grade of 5 to be able to add to the continuous evaluation.

The mark to pass the continuous evaluation will be the result of the sum of the test and the work of the subject, provided that the minimum marks required to add are obtained. To pass the continuous evaluation, this average must be 5 or higher.

Single Evaluation

Students who opt for the single evaluation will take a final synthesis test of all the content of the course (50%) and will hand in the work of the course (50%).

The date for this test and the delivery of the work of the subject will be the same scheduled in the timetable for the last exam of continuous evaluation.

The same recovery system will be applied as for the continuous evaluation.

Evaluation of the students in second or more summons

Students who repeat the course must take the scheduled tests and exams and hand in the course work on the dates indicated in the Moodle classroom.

Recovery Exam

The student who does not pass the course, who does not reach 5 (total) out of 10, according to the criteria established in the two previous sections may take a final exam if he/she has been evaluated in a set of activities that is equivalent to a minimum of two thirds of the total grade of the course. If he/she has not been evaluated in these two thirds because he/she has not taken the tests or handed in the work, he/she will obtain a grade of Not Evaluable according to the EPSI Evaluation Regulations, without the possibility of taking the final exam.

In this exam, all the contents of the course that have not been passed in the continuous evaluation will be re-evaluated.

In the case of passing the final exam the subject and/or the delivery of the work, will be approved with a maximum of 5, regardless of the grade obtained in the exam.

Changing the date of a test or exam

Students who need to change an evaluation date must submit the request by filling out the document found in the EPSI Tutoring Moodle space.

Once the document has been filled in, it must be sent to the subject teacher and to the Grade Coordination.

Revision

At the time of each evaluation activity, the faculty will inform the students of the grade review mechanisms.

For single evaluation students, the review process will be the same.

Consult the EPSI Evaluation Regulations.

Other considerations - Plagiarism

Without prejudice to other disciplinary measures deemed appropriate, and in accordance with current academic regulations, "in the event that the student performs any irregularity that may lead to a significant variation in the grade of an act of evaluation, this act of evaluation will be graded with a 0, regardless of the disciplinary process that may be instigated. If several irregularities occur in the acts of evaluation of the same subject, the final grade of this subject will be 0 \".

If during the correction there are indications that an activity or work has been done with answers assisted by artificial intelligence, the teacher may supplement the activity with a personal interview to corroborate the authorship of the text.

If there are unforeseen circumstances that prevent the normal development of the course, the teacher may modify both the methodology and the evaluation of the course.

Use of IA

For this course, the use of Artificial Intelligence (AI) technologies is permitted exclusively for support tasks, such as bibliographic or information searches, text correction, or translations. The student must clearly identify which parts have been generated using this technology, specify the tools used, and include a critical reflection on how these have influenced the process and the final outcome of the activity. Lack of transparency regarding the use of AI in this assessed activity will be considered a breach of academic integrity and may result in partial or total penalties in the grading of the activity, or more serious sanctions in more severe cases
