Learning activities and methodology

Title	Hours	ECTS	Learning outcomes
Practical classes	37.5	1.5	
Autonomous activities	58	2.32	
Master classes	37.5	1.5	

Methodology:

Master classes
Practical classes
Evaluation tests

Annotation: within the schedule set by the centre or degree programme, 15 minutes of one class will be reserved for students to evaluate their lecturers and their courses or modules through questionnaires.

Assessment

Continuous assessment activities

Title	Weight	Hours	ECTS	Learning outcomes
Final exam	50%	2	0.08	KA11, KA12, SA24, SA26, SA27

Legal application of theoretical knowledge	50%	15	0.6	CA09, KA10, KA11, KA12, SA24, SA25, SA26, SA27
--	-----	----	-----	--

Evaluation

The evaluation is based on two elements:

1. Continuous evaluation activities (50% of the final grade)

The format of these activities is defined by each subject. In this subject the following activities will be carried out:

- Up to 3 points scheduled activities. A total of 3 (1 point per activity) will be made.
- Up to 2 points the questionnaires in class (they can be test type, short questions, etc). A total of 6 will be made (0.5 points for each questionnaire. The 4 best marks will be computed). DO NOT COMMUNICATE PREVIOUSLY

Absences that occur in these activities can not be recovered at another time unless justified by force majeure. Therefore, this rule can only be excepted in very specific cases (for example, prolonged absences for health or similar reasons). Attendance is mandatory and an essential requirement to be evaluated. A non-attendance of more than 20% of the classes will imply not being evaluated.

The scheduled activities will be communicated by the teachers during class sessions and/or will be published in the Moodle classroom.

2. Final exam (50% of the final grade)

Test of 40 questions, according to the pattern of the entrance exam of the Ministry of Justice (4 response options, penalizing errors. Three incorrect questions, one correct answer remains)

It is only valued from a minimum grade of 4 (out of 10). Whoever has a lower grade, suspends the module.

Possibility of reevaluation: whoever has obtained an exam score of less than 4, may be re-submitted to recover it. This recovery affects only the test score, not the qualification of the continuous evaluation, which is maintained.

Possibility of uploading an exam grade: the student who wants to improve his or her exam score can be re-evaluated. The grade obtained in the reevaluation will be your exam grade, whether or not it is higher than the one obtained in the first exam.

It does not accept a single assessment system.

3.Restricted use of Artificial Intelligence (AI)

For this subject, the use of Artificial Intelligence (AI) technologies is permitted exclusively in support tasks, such as bibliographic or information searches, text correction or translations. The student will have to clearly identify which parts have been generated with this technology, specify the tools used and include a critical reflection on how these have influenced the process and the final result of the activity. The non-transparency of the use of AI in the assessable activities where its use is allowed, will be considered a lack of academic honesty and may lead to a partial or total penalty in the grade of the activity, or greater penalties in serious cases
