Articles

| | |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| Bui Dac Tac, Le Mau Hai, Nguyen Quang Dieu , The linear invariants (DN) and ($\overline{\Omega}$) for spaces of germs of holomorphic functions on compact subsets of \mathbf{C}^n | 49–68 |
| I. Harlouchet , Trace de Cauchy pour certaines fonctions localement intégrables sur un ouvert borné de \mathbf{C} | 69–102 |
| G. Gromadzki, M. Stukow , Involving symmetries of Riemann surfaces to a study of the mapping class group | 103–106 |
| R. Dujardin , Sur l'intersection des courants laminaires | 107–125 |
| F. Loray, M. van der Put, F. Recher , Counting fixed points of a finitely generated subgroup of $\text{Aff}[\mathbf{C}]$ | 127–137 |
| H. Ahn , Weighted L^p estimates for the $\overline{\partial}$ -equation on convex domains of finite type | 139–157 |
| P. Auscher , On L^p estimates for square roots of second order elliptic operators on \mathbb{R}^n | 159–186 |
| G. David , Hausdorff dimension of uniformly non flat sets with topology | 187–225 |
| C. Bisi , On commuting polynomial automorphisms of \mathbf{C}^2 | 227–239 |
| S. J. Gardiner, A. Gustafsson , Smooth potentials with prescribed boundary behaviour | 241–249 |
