

Open Access publishing

Contents prepared by the UAB Library Service staff:

David Barri, Carme Besson, Virtudes Guzmán

UAB Universitat Autònoma
de Barcelona

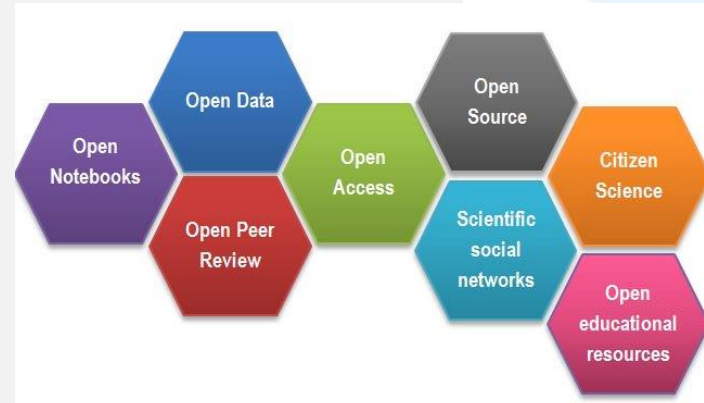

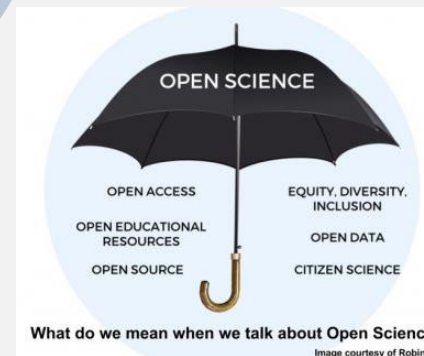

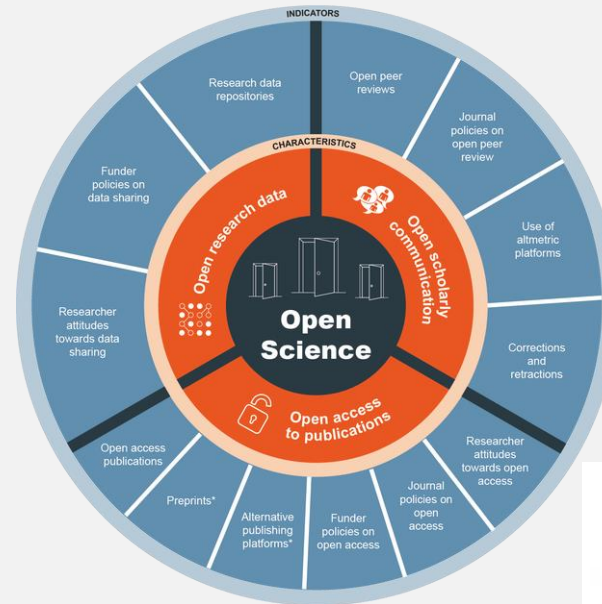

We will talk about...

- Open Access
- Open Access publishing
- Identification systems
- Scholarly networks
- Recommendations

Open Science

- New approach to scientific research based on cooperative workflows and new ways of dissemination through digital technologies and collaborative tools
- Stronger interaction between researchers and society
- Higher productivity, efficiency, transparency and response to research needs in all areas

Open Access: what is it?

“Free availability on the public Internet, permitting any users to read, download, copy, distribute, print, search or use for any other lawful purpose, without financial, legal or technical barriers.”

Budapest Manifesto, February 2002

Open Access ≠ Free Access

Open Access: benefits

- Increases **visibility** and, consequently, dissemination and impact of scientific production. Increase in citations
- Increases the **accessibility** of research papers without further expense
- Allows authors to decide the **rights** to be kept or transferred and the conditions
- Gives back to **society** the investment made in research
- **Preserves** research results in the long term

Open Access: obligatory nature

- Real decreto 99/2011, de 28 de enero, por el que se regulan las enseñanzas oficiales de doctorado.
- Ley 14/2011, de 1 de junio, de la Ciencia, la Tecnología y la Innovación. Artículo 37
- Plan Estatal de Investigación Científica y Técnica y de Innovación 2017-2020 (des de 2013)

- Horizon 2020 (2014-2020): EU framework programme for research and innovation
- Horizon Europe (2021-2027)

- UAB Institutional Open Access Policy (2012)
- UAB Institutional Open Data Policy (to be approved in 2020)

cOAlition S

Making Open Access a reality by 2020

A DECLARATION OF COMMITMENT
BY PUBLIC RESEARCH FUNDERS

<http://scieur.org/coalition-s>

Plan S

- **What's it?** An initiative born in September 2018 that aims to accelerate the transition to Open Access publishing
- **What support does it have?** cOAlition S: an international consortium launched by major national research agencies and funders
- **How to align with Plan S?** Following its 10 principles

MAIN PRINCIPLE

“With effect from 2021, all scholarly publications on the results from research funded by public or private grants provided by national, regional and international research councils and funding bodies, must be published in **Open Access Journals**, on **Open Access Platforms**, or made immediately available through **Open Access Repositories without embargo.**”

DDD fulfills the mandatory requirements of Plan S.

[Real decreto 99/2011](#), de 28 de enero,
por el que se regulan las enseñanzas oficiales de doctorado

Artículo 14. Evaluación y defensa de la tesis doctoral

5. Una vez aprobada la tesis doctoral, la universidad se ocupará de su archivo en formato electrónico abierto en un repositorio institucional y remitirá, en formato electrónico, un ejemplar de la misma así como toda la información complementaria que fuera necesaria al Ministerio de Educación a los efectos oportunos.

6. En circunstancias excepcionales determinadas por la comisión académica del programa, como pueden ser, entre otras, la participación de empresas en el programa o Escuela, la existencia de convenios de confidencialidad con empresas o la posibilidad de generación de patentes que recaigan sobre el contenido de la tesis, las universidades habilitarán procedimientos para desarrollar los apartados 4 y 5 anteriores que aseguren la no publicidad de estos aspectos.

Further information: [Online thesis deposit \(UAB\)](#)

Thesis embargo?

Publication of articles derived from doctoral theses is allowed by most publishers. See information from publishers.

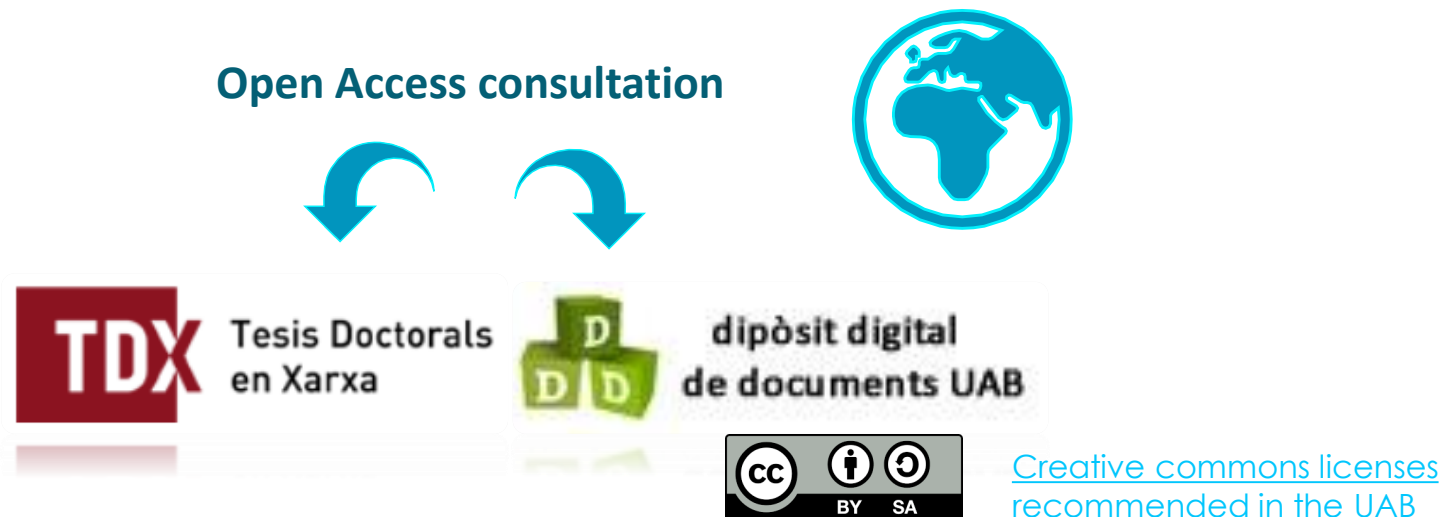

ELSEVIER

About Solutions Services Shop

- **Multiple, redundant or concurrent publication:** An author should not in general publish manuscripts describing essentially the same research in more than one journal or primary publication. Elsevier **does not view the following uses of a work as prior publication:** publication in the form of an abstract; **publication as an academic thesis;** publication as an electronic preprint. Note: some society-owned titles and journals that operate double-blind review have different policies on prior publication. Information on prior publication is included within each Elsevier journal's guide for authors.

Evidence of high individual variability in seed management by scatter-hoarding rodents : does 'personality' matter?

Feldman, Mariano (Centre de Recerca Ecològica i Aplicacions Forestals)

Ferrandiz-Rovira, Mariona  (Centre de Recerca Ecològica i Aplicacions Forestals)

Espelta Morral, Josep Maria  (Centre de Recerca Ecològica i Aplicacions Forestals)

Muñoz, Alberto (Universidad Complutense de Madrid. Departamento de Didactica de las Ciencias Experimentales)

Universitat Autònoma de Barcelona

Data: 2019

Resum: We analysed the individual variation in behaviour by scatter-hoarding rodents. The perceived predation risk was manipulated to assess the consistency of behaviour. Individual differences explained more than 80% of total behavioural variance. Rodents showed an extraordinary consistency in their individual behaviour. We highlight the relevance of individual behaviour in scatter-hoarding animals.

Digital identity

It is made up of all we publish on the Internet and the way we are seen in cyberspace.

Digital identity

Since this identity is built up it may not fit exactly an analogue identity.

Scientific reputation is essential for researchers in order to gain progress, recognition and grants for academic research.

Author identification systems

A professional name and a standard signature are strongly recommended so that your scientific production has good retrieval and a greater visibility.

A permanent code helps to avoid ambiguities in personal names.

Information about [ORCID](https://orcid.org)
<https://orcid.org>

This is a 16-digit code that identifies unequivocally and over time all the scientific production by one single author. It is universal and free of charge.

Adopted by UAB, other universities, journal publishers and research evaluation agencies.

Biography

Full Profesor (Retired) of East Asian Studies at the Universitat Autònoma de Barcelona. Born of Irish parents in London. Early childhood in Ballina and Ballaghaderreen (Ireland). Schooled in Connecticut and Massachusetts (USA). Returned to the home place in Ireland to live. Lived and worked some years in Tianjin and Beijing (China). Before China, a specialist in Irish Studies and James Joyce; after, a specialist in Chinese thought, politics, and international relations. Divides his time now among Barcelona (Spain), Ballyconnell (Sligo, Ireland) and Beijing (China).

Other identification systems

SCOPUS-ID (Scopus)

- Identification system of the **Scopus** database.
- It gathers all the variant names and assigns **one single code** to each author or institution.
- It allows **information transfer** from ORCID and bibliographic reference managers (Endnote, Zotero, Mendeley...).
- This identifier is **automatically** assigned. Author profile can be modified.

[How do I correct my author profile?](#)

PUBLONS (WoS)

- Identification system of the **Web of Science** (WoS) database.
- It gathers all the variant names and assigns **one single code** to each author or institution.
- It allows **information transfer** from ORCID and bibliographic reference managers (Endnote, Zotero, Mendeley...).
- This identifier is **not automatically** assigned, unless you have previous articles in Web of Science or you previously had a Researcher-ID code.

Composite Salt in Porous Metal-Organic Frameworks for Adsorption Heat Transformation

Garzón Tovar, Luis (Institut Català de Nanociència i Nanotecnologia)

Pérez Carvajal, Javier (Institut Català de Nanociència i Nanotecnologia)

Imaz, Inhar  (Institut Català de Nanociència i Nanotecnologia)

Maspoch Comamala, Daniel (Institut Català de Nanociència i Nanotecnologia)

Data: 2017

Resum: Adsorptive heat transformation systems such as adsorption thermal batteries and chillers can provide space heating and cooling in a more environmental friendly way. However, their use is still hindered by their relatively poor performances and large sizes due to the limited properties of solid adsorbents. Here, the spray-drying continuous-flow synthesis of a new type of solid adsorbents that results from combining metal-organic frameworks (MOFs), such as UiO-66, and hygroscopic salts, such as CaCl₂ has been reported. These adsorbents, commonly named as composite salt in porous matrix (CSPM) materials, allow improving the water uptake capabilities of MOFs while preventing their dissolution in the water adsorbed; a common characteristic of these salts due to the deliquescence effect. It is anticipated that MOF-based CSPMs, in which the percentage of salt can be tuned, are promising candidates for thermal batteries and chillers. In these applications, it is showed that a CSPM made of UiO-66 and CaCl₂ (38% w/w) exhibits a heat storage capacity of 367 kJ kg⁻¹, whereas a second CSPM made of UiO-66 and CaCl₂ (53% w/w) shows a specific cooling power of 631 W kg⁻¹ and a coefficient of performance of 0.83, comparable to the best solid adsorbents reported so far.

ACADEMIA

ResearchGate

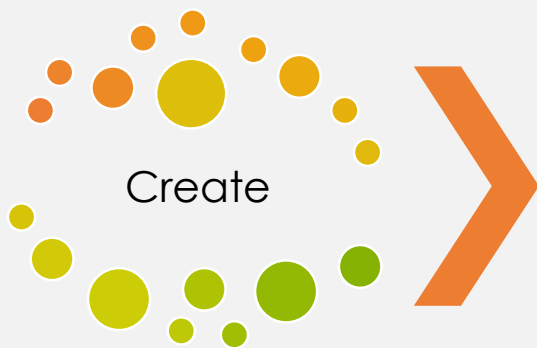

We will talk about...

- Open Access
- Open Access publishing
- Identification systems
- Scholarly networks
- Recommendations

Recommendations

Good practices...

Create

- Cite properly
- Standardised name and membership
- ORCID
- Google Scholar

Publish

- Choose journal
- Open Access
- Keep ALL versions

Disseminate

- Identify file (authorship, version and mention of rights)
- Submit to the DDD (contact your library)
- Permanent URL
- Social networks

<https://thinkchecksubmit.org/>

We suggest...
