Open Science: research and research data open by default

Source: OpenAIRE (<https://www.openaire.eu/what-is-open-science>)

What is research data?

According to European Commission:

- It refers to information, **factual** or **numerical**
- Captured to be **examined** and **considered**
- Provides the basis for **reasoning**, **debate** or **calculation**

Examples: statistics, results of experiments, measurements, observations resulting from field study, surveys or interviews and images.

Types of research data

- Data generated in the research process or **primary data**: it needs to be sorted and documented, and assessment is required when data contains personal or sensitive information.
- Data related to published results or **final data**: it needs to be identified in order to assure its access and reuse.

DATA VALUE CHAIN

⚠ Roadblocks for **production** include lack of financial, human, and technological resources; low data literacy; lack of trust between users and data collectors; blind-spots in data gaps; lack of country ownership; and lack of government desire for transparency.

⚠ Roadblocks for **use** include low political support; lack of data relevance to decisions; poor quality; lack of trust in government data use; no rewards or results of data use; financial constraints; corruption; data silos; and lack of partnerships between infomediaries.

Benefits of publishing research data

- Reinforces **open science**: data available to reuse for free
- Enhances the visibility and **impact** of one's research
- The identification with a **DOI** allows citation and metrics
- Provides **transparency to research** strengthening replicability, reproducibility and data verification
- Promotes innovation thanks to data **sharing** and **reuse**
- Avoids redundancy and duplicity in data collection: **optimizes** researcher's time and efforts
- Offers more opportunities to **collaborate** and create scientific debates

Calls – Horizon Europe (2021-2027)

Open Science across the programme

Open
Science

Mainstreaming of open science practices for improved quality and efficiency of R&I, and active engagement of society

Mandatory immediate Open Access to publications: beneficiaries must retain sufficient IPRs to comply with open access requirements;

Data sharing as ‘open as possible, as closed as necessary’: mandatory Data Management Plan for FAIR (Findable, Accessible, Interoperable, Reusable) research data

- Work Programmes may incentivize or oblige to adhere to **open science practices** such as involvement of citizens, or to use the **European Open Science Cloud**
- Assessment of open science practices through the **award criteria** for proposal evaluation
- Dedicated support to **open science policy actions**
- **Open Research Europe** publishing platform

Calls – Plan Estatal (2024-2027)

CIENCIA E INNOVACIÓN EN LA SOCIEDAD

Eje 14. **Social.** Promover el compromiso de la **sociedad española con la I+D+I**, fomentando la **divulgación y la cultura científica**, la reflexión sobre el papel de la ciencia y la tecnología en la sociedad actual, y promoviendo una ciencia e innovación **abiertas e inclusivas**.

Source: EECTI 2021-2027

5.10.
Condiciones Marco

Las condiciones marco son aquellas que, por su relevancia y transversalidad, deben estar presentes en todos los subprogramas y han de ser tenidas en cuenta en todas las actuaciones del plan.

Compromiso con la Política de Ciencia Abierta

Tal y como se ha indicado en el apartado de Marco Operativo y Planificación Estratégica, tanto en el ámbito nacional como en el europeo e internacional se promueve el compromiso con la política de ciencia abierta.

En el ámbito nacional, la EECTI y las reformas legislativas de la Ley de la Ciencia y la LOSU promueven las actuaciones dirigidas a la ciencia abierta como elementos clave para la investigación y la innovación de calidad.

Estas iniciativas de fomento y apoyo a la ciencia abierta se reflejan en la Estrategia Nacional de Ciencia Abierta (ENCA) y se distribuyen en torno a cuatro ejes estratégicos:

Ⓐ Infraestructuras digitales para la ciencia abierta	Ⓔ Gestión de datos de investigación siguiendo los principios FAIR
Ⓜ Acceso abierto a publicaciones científicas	Ⓒ Incentivos, reconocimientos y formación

Institutional policy on Open Access to Research Data

- **Preamble:** the University acknowledges the importance of research data
- **Scope:** This policy applies to all research staff in active employment
- Aspects related to **data storage**: repository, preservation, FAIR commitment, time limits of data publication...
- Data must be made available under a less restrictive license for **reuse**, such as CC0 or CC BY Creative Commons Licenses
- **Responsibilities** of stakeholders: research staff and the University
- **Validity:** it came into effect in March 2020 and will be revised every 5 years (updated in December 2022)

Findable

Data and metadata easy to find and to read by humans and machines

Accessible

Data and metadata retrievable and harvestable

Interoperable

Data and metadata able to interoperate with other systems

Reusable

Replicability of data and metadata

- ✓ Persistent identifier: DOI (preferably) and/or URI
- ✓ Publication in institutional or subject repositories. Data must be described according to international standards.
- ✓ Data described in detail: origin, date of collection, environmental circumstances, observations...
- ✓ Every dataset with a Creative Commons license, or a Public Domain license

Repositories

A trusted digital repository is one whose mission is to provide **reliable, long-term access** to managed digital resources to its designated community, now and in the future

CORA.RDR

Datasets

- dataverse.csuc.cat/dataverse/UAB

CORA.RDR is...

F	It assigns persistent identifiers (DOI/URI)	✓
	It uses International standards	✓
	Its content is searchable and retrievable	✓
A	Data and metadata accessible with open and standard communication protocols	✓
I	It uses international standards for metadata description	✓
R	Data described in detail	✓
	Every dataset with a Creative Commons license, or a Public Domain license	✓
	Subject area standards / recognized general standards for description are employed	✓

CORA.RDR – Publish your data

- ✓ ORCID identifier
- ✓ abstract of the content (it can be in different languages)
- ✓ keywords (in different languages)
- ✓ assign Creative Commons license - [UAB recommendations](#)
- ✓ note the project's code (if your research is supported by a grant)
- ✓ A Readme.txt file describing the dataset - [readme template](#)
- ✓ files in open formats (txt, csv, pdf, jpg, MP3...) - [recommended formats](#)
- ✓ identify any related work (article, thesis, book...)
- ✓ each dataset can be up to 500 GB or contain a maximum of 5000 files (you can contact your library if you need more space for your data)

Checklist per publicar a CORA.RDR Repositori de Dades de Recerca

SI VOLS DEPOSITAR UN CONJUNT DE DADOS A CORA.RDR, SEGUÏEIX ELS SEQUELENTS PASSOS:

Prepara

- ☐ **Organitza i anomena els fitxers**
 - Segueix [aquests consells](#) per anomenar i organitzar els fitxers.
- ☐ **Converteix els fitxers a formats recomanats**
 - Escull un [format de fitxer](#) que sigui adequat per una preservació a llarg termini.
 - Converteix els fitxers a un format obert i no propietari, sempre que puguis, abans de fer el dipòsit.
- ☐ **Prepara un fitxer README**
 - Descrís les teves dades en un fitxer README, pots utilitzar una [plantilla](#).
 - Descrís en format de text pla (.txt) amb codificació de caràcters Unicode UTF-8.
- ☐ **Mida de les dades**
 - El conjunt de dades pot contenir com a màxim 2000 fitxers.
 - La mida total del conjunt de dades no pot superar els 100 GB.
 - Per a fitxers o conjunts de dades més grans, posa't en [contacte](#) amb el nostre personal de suport.

Diposita (*)

- ☐ **Registra't a CORA.RDR**
- ☐ **Diposita el dataset**
 - Entra a la col·lecció de la UAB (<https://dataverne.csuc.cat/dataverne/UAB/>).
 - Clica el botó "Add Data" i selecciona "New Dataset".
- ☐ **Introdueix les metadades bàsiques**
 - Introdueix totes les metadades com sigui possible.
 - Indica què has llegit i acceptes els [termes i condicions de dipòsit, preservació i col·laboració de CORA.RDR](#).
 - Clica el botó "Save Dataset".
- ☐ **Introdueix més metadades**
 - Selecciona la pestanya "Metadats" i clica al botó "Add+Edit Metadata" (neu: que apareixeran més camps de metadades que abans).
 - Clica el botó "Save Changes".
- ☐ **Confirma o especifica una llicència**
 - Per defecte s'assigna la llicència CC0 per la major reutilització de les dades. Si no és l'adequada, escull i/o defineix qualsevol altra llicència.
- ☐ **Afegir els fitxers**
 - Selecciona la pestanya "Fitxers" i clica el botó "Upload Files".
 - Per afegir fitxers, clica el botó "Select Files to Add" o arrossega'ls.
 - Pots [eliminar](#) o [eliminar](#) alguns fitxers del conjunt de dades, si és necessari.
- ☐ **Comparteix l'error**
 - Necessaries compartir el teu conjunt de dades abans de publicar-lo? Pots [compartir-lo](#) amb el conjunt de dades amb què vulguis.

(*) Des de les biblioteques et podem donar suport, especialment si és la primera vegada que diposites dades a CORA.RDR. [Contacta'ns](#)

Envia

- ☐ **Envia el conjunt de dades a revisió**
 - Tingues en compte que el teu conjunt de dades es troba en esborrany. El teu DOI encara no és actiu.
 - Ja has preparat el conjunt de dades seguint la [guia d'usuari](#)? Clica a "Submit for Review".

Publica

- ☐ **Caració**
 - El personal dedicat a la caració de dades de la Universitat revisarà el conjunt de dades per veure si compleix amb el [reglament de CORA.RDR](#) i el [RGPD](#), i, si és necessari, t'informarà dels canvis que cal fer abans de publicar-lo.
- ☐ **Revisió**
 - Si cal, aplica els canvis recomanats.
 - Ja s'ha fet la revisió? Clica el botó "Submit for Review".
- ☐ **Publicació**
 - Una vegada el teu conjunt de dades ha estat aprovat, el personal dedicat a la caració de dades el publicarà. El DOI del conjunt de dades, llavors, ja serà actiu.

Després de la publicació

- ☐ **Cita el teu conjunt de dades** a les publicacions relacionades utilitzant el DOI del teu conjunt de dades a CORA.RDR.
- ☐ **Modificacions després de la publicació**
 - Inicia revisió i clica el botó "Edit Dataset".
 - Fes els canvis necessaris. Per afegir una nova versió d'un fitxer, primer [publica l'actiu a premsa](#).
 - Clica a "Save Changes", si has actualitzat les metadades, o a "Done" si has actualitzat els fitxers.
 - El personal dedicat a la caració de dades de la teua institució revisarà les modificacions i tornarà a publicar el dataset.
 - Tingues en compte que aquest procés farà que es creï una [nova versió](#) del dataset.

More repositories

Check if there is any consolidated repository in your area where you can publish your research data.

There are tools to find existing research data repositories:

Here you can read more information about thematic repositories:

confluence.csuc.cat/display/RDM/Repositoris+disciplinaris

More repositories – selection criteria

1. Is there any representative repository in your research area?
2. Is it a trusted repository or is it going to get any certification as, for example, CoreTrustSeal?
3. Does the repository allow you to deposit the data in the format used?
4. Does it match your file size needs?
5. Does it allow you to restrict access to data (*closed data, restricted data or embargoed data*)?
6. Do the licenses offered in the repository satisfy your needs?
7. Are the terms and conditions of the repository clear?
8. Are there guides to publish datasets?
9. Does it assign a persistent identifier to data?
10. Do the depositing and recovery conditions match your needs?
11. Is it a cost-free data repository or does it charge for its services?
12. Is it possible to link data to related publications?
13. Does it have a preservation policy?
14. Is it possible to deposit different file versions?
15. Does it offer usage statistics?
16. Is there any curation service?
17. Does it accomplish the requirements of your funding agency?
18. Is it integrated with other platforms (i.e. Zenodo, GitHub)?
19. Are the datasets visible?

CORA .RDR
Publish your
data

**More
repositories**

**Best
practices**

Important

- ✓ A README file with all the dataset details: contents of every file, units of measurement, how the data was obtained, etc.
(ddd.uab.cat/record/226740)
- ✓ Recognizable file names (ddd.uab.cat/record/233037)
- ✓ Files in open formats (txt, csv, pdf, jpg, MP3...)
- ✓ Cite all the data employed in your research: third-party data and your own data as well (ddd.uab.cat/record/233039)
- ✓ Have a DMP together with your data
- ✓ Every dataset has its own DOI identifier

And remember

**Your data should be
comprehensive enough to allow
anyone to understand it and
reuse it**

Examples

- ✓ Relation between the article and data (relation DDD-CORA.RDR)

doi.org/10.34810/data29

- ✓ Data availability in the published document

doi.org/10.1016/j.molp.2022.04.010

DATA AVAILABILITY

RNA-seq raw and processed data generated in this study can be found in GEO (GSE198022). All code used for analysis can be found at <https://doi.org/10.34810/data174>.

Data citation

A typical data citation generally consists of these elements:

- Author(s)
- Title of dataset
- Publication year
- Digital Object Identifier
- Type of resource
- Version, when appropriate

If relevant, other elements can be included, such as: author ID, data repository, access date and time...

Be sure to follow the general citation format for the style you use in a text (APA, MLA...)

Propietat Intel·lectual i Accés Obert

Resoleu els vostres dubtes

Aquest web conté un recull de preguntes més freqüents (PMF) que aporten informació en matèria de propietat intel·lectual i accés obert, de caràcter orientatiu i sense que es puguin considerar, en cap cas, assessorament jurídic per part de la Universitat Autònoma de Barcelona. Hi podeu accedir fent una cerca a la casella o bé navegant per les carpetes temàtiques.

Cerqueu les paraules que defineixen la vostra consulta, en català. Si escriviu una paraula o una frase entre cometes, als resultats només s'inclouen pàgines amb les mateixes paraules en ordre idèntic al contingut de les cometes.
