

Coordinator: Sofia Fonseca

Module 2: Introduction to African Archaeology

Archaeobotany: The study of pollen

Michèle Diniez, German Archaeological Institut, botanist

Teaching resources:

The Global Pollen Project: <https://globalpollenproject.org/> - an open platform for pollen identification (and more)

PalDat Palynological Database: <https://www.palдат.org/> - an open platform for pollen identification

African Pollen Database: <https://africanpollendatabase.ipsl.fr/#/about>

European Pollen Database: <http://www.europeanpollendatabase.net/index.php> – European (including Mediterranean) datasets

Neotoma: <https://www.neotomadb.org/> - a global database of pollen and other palaeoecological proxies, and some additional tools

African Plant Database: <http://www.ville-ge.ch/musinfo/bd/cjb/africa/index.php?langue=an> - an excellent database of present African plant taxa and their distribution

PAGES Past Global Changes: <http://www.pastglobalchanges.org/> - paleoscience association for scientific research and networking on past global changes.
