

Module 3: Coping and adapting to climate change impacts

Module presentation and Learning objectives

In Module 3, we describe coping and adaptive strategies that IPLC from around the world have used to respond to the impacts of climate change. After an introductory video, the module is structured around examples of the following IPLCs' responses:

- i) sharing and cooperation,
- ii) diversification,
- iii) exchange,
- iv) storage,
- v) forecasting,
- vi) rationing,
- vii) mobility.

Learning objectives:

1. Understand the concepts of adaptation and coping
2. Familiarize themselves with different types of local responses to climate change impact
3. Study several examples of adaptation to climate change in depth
4. Think critically about the concept of “adaptation”
