

Reflection on the module

Linguistic Diversity in the World: Introduction and Transversal Perspectives

Please reflect on the following questions:

Linguistic Diversity

What is linguistic diversity? What idea do you have about it? Where does this idea come from? What would you do with linguistic diversity? Why? Please share your ideas with us!

Experiencing languages

Speaking languages may drive to different experiences. What language/s do you consider your/s? How did you learn it/them? How do you use it/them in different contexts, including digital spaces? How do you feel speaking and writing your family language/s? Which factors do influence your language choice and your feelings related to it, according to your opinion?

Languages and society

What languages are spoken around you? Do they have a legal recognition? Are they present in schools, mass media, on-line platforms and other public fields? Is there any sort of social or political hierarchy between different languages? Are there specific policies aimed at protecting and promoting diversity?
