

# Management, assessment and minimization of waste in the industry in Catalonia.

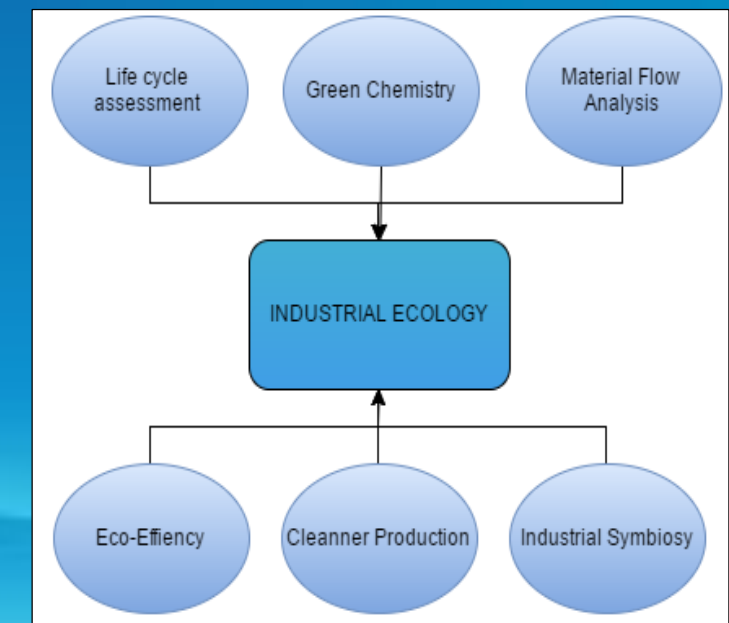

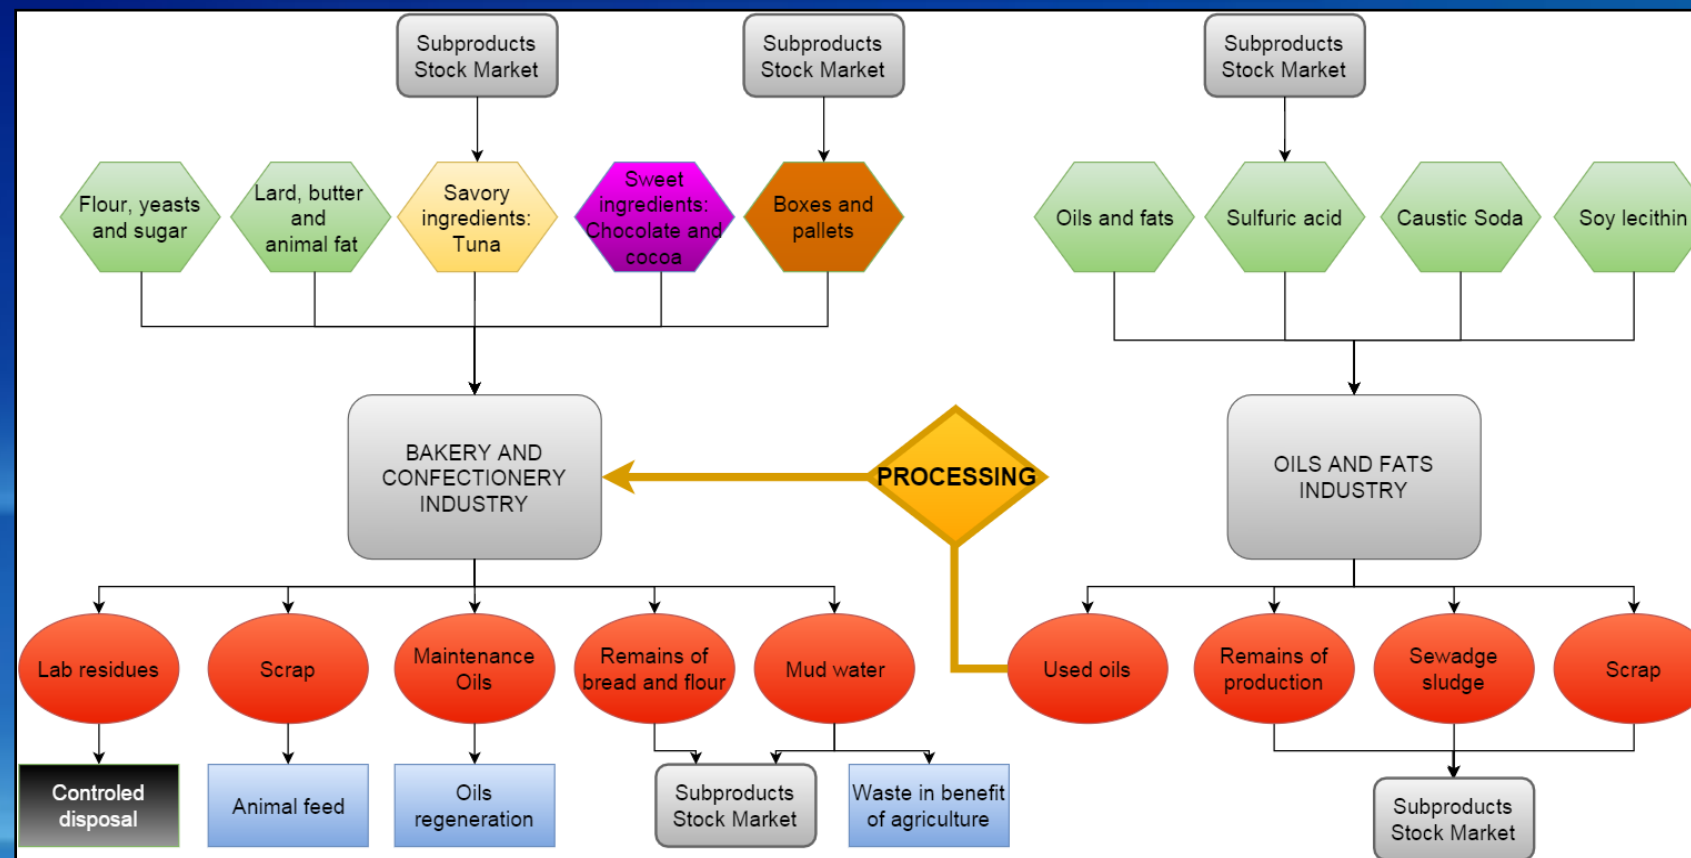

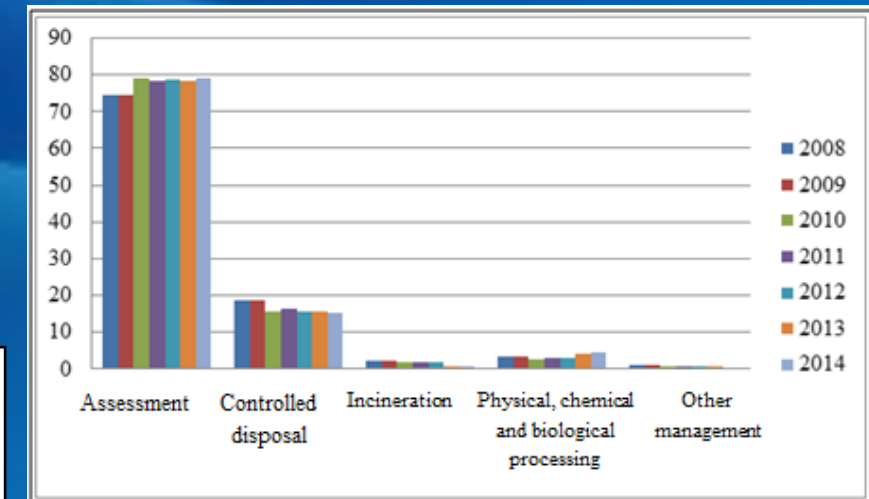

## Elaboration of a hypothetical plan of industrial symbiosis

Guillermo de Lara, NIU: 1335236

June 2016

### OBJECTIVES:

- Know the industrial waste management.
- Different mechanisms to minimize and value the waste.
- Develop a project of industrial symbiosis

### CONCLUSIONS:

- Achieve the objectives of industrial ecology is complicated.
- Over time, industries has been reducing the generation of waste and increasing the amount of waste recycled.
