EMERGING TECHNOLOGIES AS
TOOLS IN HUMAN TRAFFICKING

UAB
Universitat Autònoma
de Barcelona

1.INTRODUCTION

- Human trafficking is the world's third largest criminal enterprise
- 50\$ billion / year worldwide
- 46.9\$ billion/year in developed economies and the EU
- 14.145 victims reported by EU Member States (2017-2018)
- Technologies facilitate the trafficking cycle

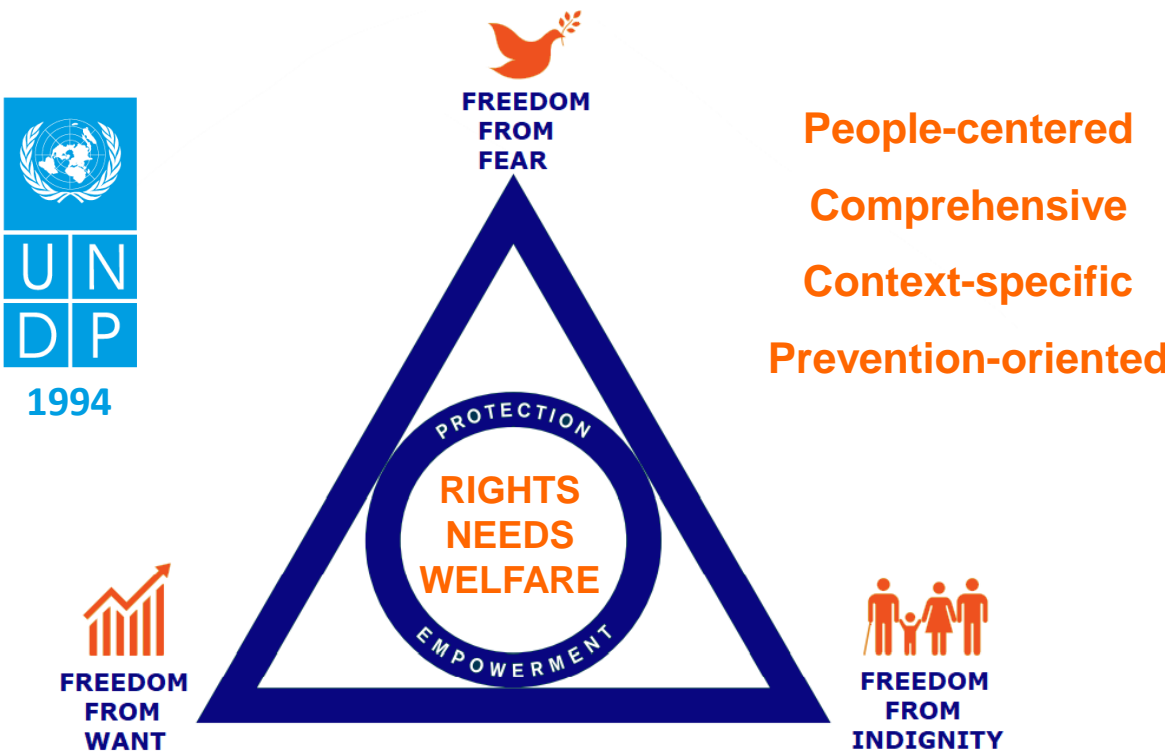

How does the use of new technologies in the human trafficking business threaten human security in the European Union?

2.ANALYTICAL FRAMEWORK

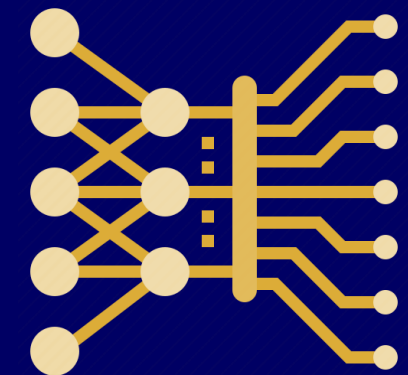

HUMAN SECURITY

3.ANALYSIS

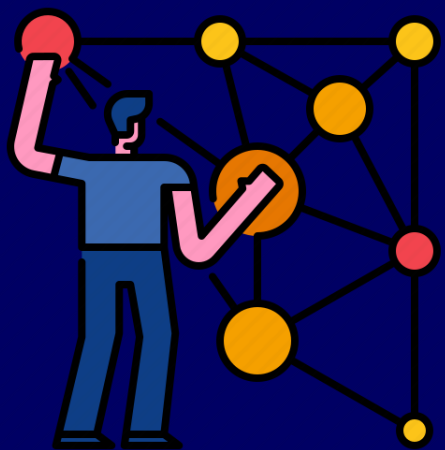

Analyzed technologies and their use in human trafficking stages

	R*	C*	A*	E*	M*
Current use					
Internet "clearnet" platforms and smartphone apps	✓	✓	✓	✓	
Internet "darknet" platforms			✓	✓	✓
Telephones		✓			
Cameras and microphones		✓		✓	
Cryptocurrencies					✓
Future trends					
Artificial Intelligence (AI)		✓	✓	✓	
5G and Internet of Things (IoT)		✓		✓	
New transport infrastructures		✓			

TECHNOLOGICAL
TRANSFORMATION
OF
HUMAN
TRAFFICKING

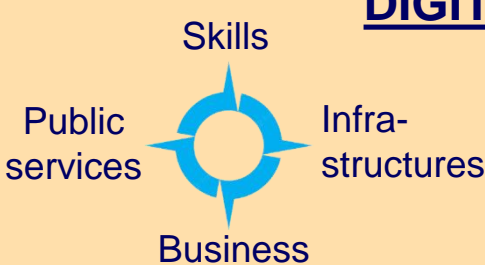

3 IMPACTS

Threats of the 3 impacts to human security

		Freedom from FEAR	Freedom from WANT	Freedom from INDIGNITY
1 Facilitation of recruitment and control of victims	Society	- Fear of human trafficking - Fear that other crimes and abuses escalate - Fear of using technologies	- Need for a safe use of technology - Need for effective institutions	Facilitation of the violation of the rights to: - Life - Liberty and security
	Victims	- Fear of privacy intrusion - Fear of loss of reputation and credibility	- Need for privacy and intimacy	- Not to be submitted to slavery, servitude, forced or bonded labour - Not to be subjected to torture and/or degrading treatment or punishment
2 Expansion of the market and profits	Society	- Fear of human trafficking - Fear that other crimes and abuses escalate - Fear of using technologies	- Need for a safe use of technology - Need for effective institutions	- To be free from gendered violence - To freedom of association
	Victims	- Fear of further exploitation	- Need for privacy and intimacy	- To freedom of movement - To the highest attainable standard of health
3 Reduction of the risk of detection	Society	- Fear of human trafficking - Fear that other crimes and abuses escalate - Fear that institutions are unable to address threats of different nature	- Need for effective institutions	- To favorable work conditions - To an adequate standard of living - To social security
	Victims	- Fear of not getting their lives back, feeling of unprotected		- To special protection of children - To non-interference in private life, nor attacks on honor or reputation

4.EU EFFORTS

DIGITAL STRATEGY (2020)

Technology that works for people
Fair and competitive digital economy
Open, democratic and sustainable society

DECLARATION ON DIGITAL RIGHTS AND PRINCIPLES (2022)

CYBERSECURITY STRATEGY (2020)

EUROPOL

EU Strategy on Combating Trafficking in Human Beings 2021-2025

- Digital transformation and online crime are a **priority**
- Focus on **empowering people**
- Focus on protecting **rights, opportunities and well-being**

5.CONCLUSIONS

- Technologies do **not** create a **new crime**, but rather **transform** it
- Technologies have **three main impacts** on human trafficking
- These three impacts pose a **series of threats** to the **three pillars** of human security
- The three pillars of human security are **interlinked**: one "freedom" is not realized without the other two
- The **EU** is adopting an approach **close to human security**. This should be a subject of **future studies**
- **Human security** is a **very relevant** concept for the case study, as it has been **successful to broaden** it to **identify the threats** that the **use of technologies in human trafficking poses to people's welfare**. Therefore, human security implications of the misuse of technologies need **further exploration**.

RECOMMENDATIONS

To: Law Enforcement Agencies of EU Member States

- 1- Clearly understand the problem of technology-facilitated human trafficking and the purpose of technology-based solutions
- 2- Keep abreast of changes and consider victims' experience
- 3- Establish formalized communication channels with stakeholders
- 4- Develop partnerships with online platforms providers
- 5- Collect representative statistical data
- 6- Provide hotlines for emergencies
- 7- Improve online victims identification capabilities
- 8- Organize prevention campaigns
- 9- Use digital evidences to prevent victims from difficult experiences
- 10- Include initiatives to remove victims'fear of technologies
